INCREASED COLLABORATION

RSA

Importance of Security-Risk Collaboration

To what extent do you agree with this statement? *The security and risk teams in an organization need to work together in a coordinated way (such as sharing data or planning processes together) to effectively manage the risks that may emerge or increase due to their organization's digital transformation.*	**Percentage of Respondents**
Strongly agree	56.2%
Somewhat agree	36.5%
Neither agree nor disagree	6.5%
Somewhat disagree	0.5%
Strongly disagree	0.2%
Don't know	0.2%

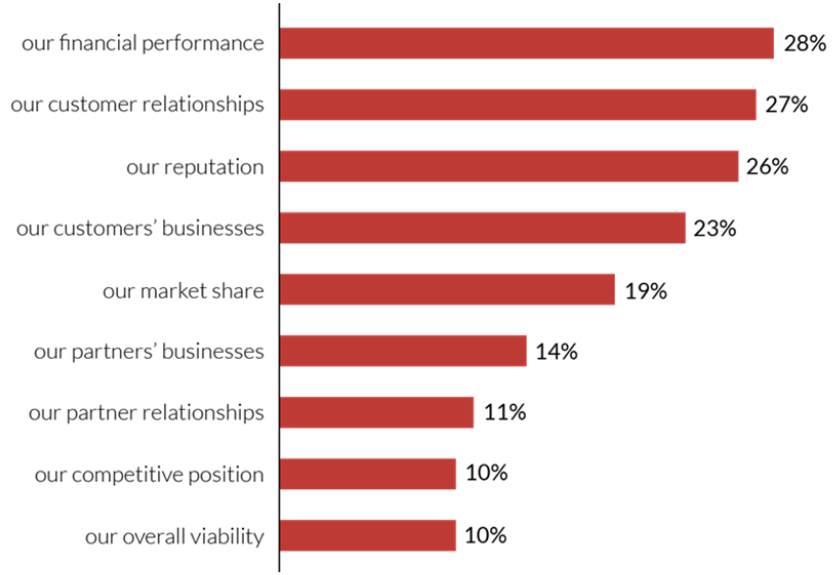
n=600

North America Results

Note: Results may not sum to 100% due to rounding.

Consequences and Steps Taken

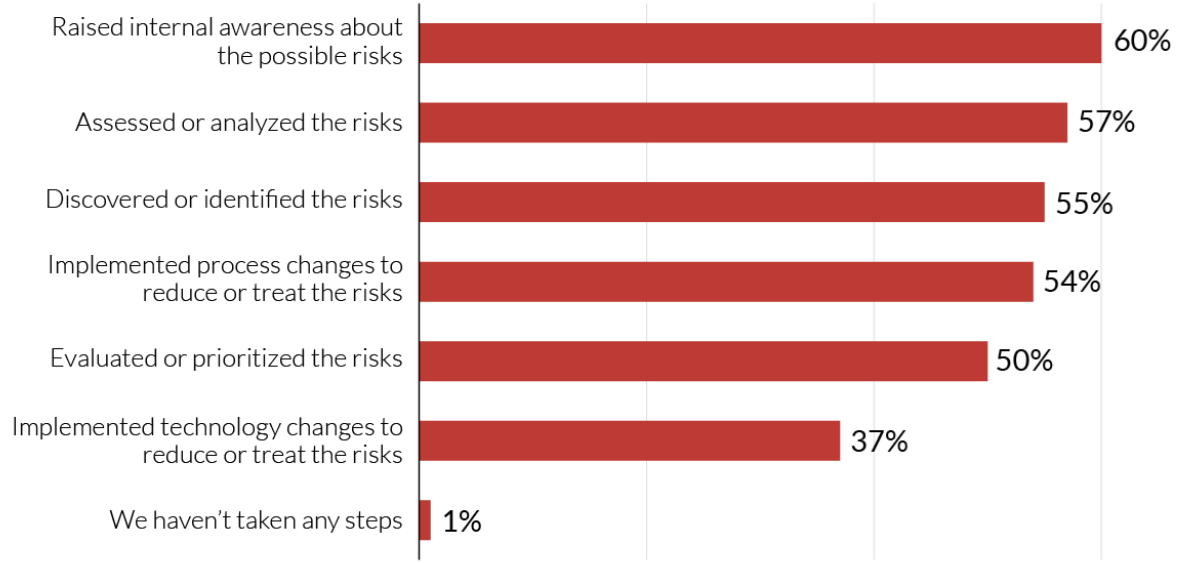
Negative Impacts of Unmanaged Digital Risk



"If your organization was unable to sufficiently manage its digital risks (the risks that may emerge or increase due to your digital transformation), which of the following possible consequences would you be most concerned about? Select up to two."

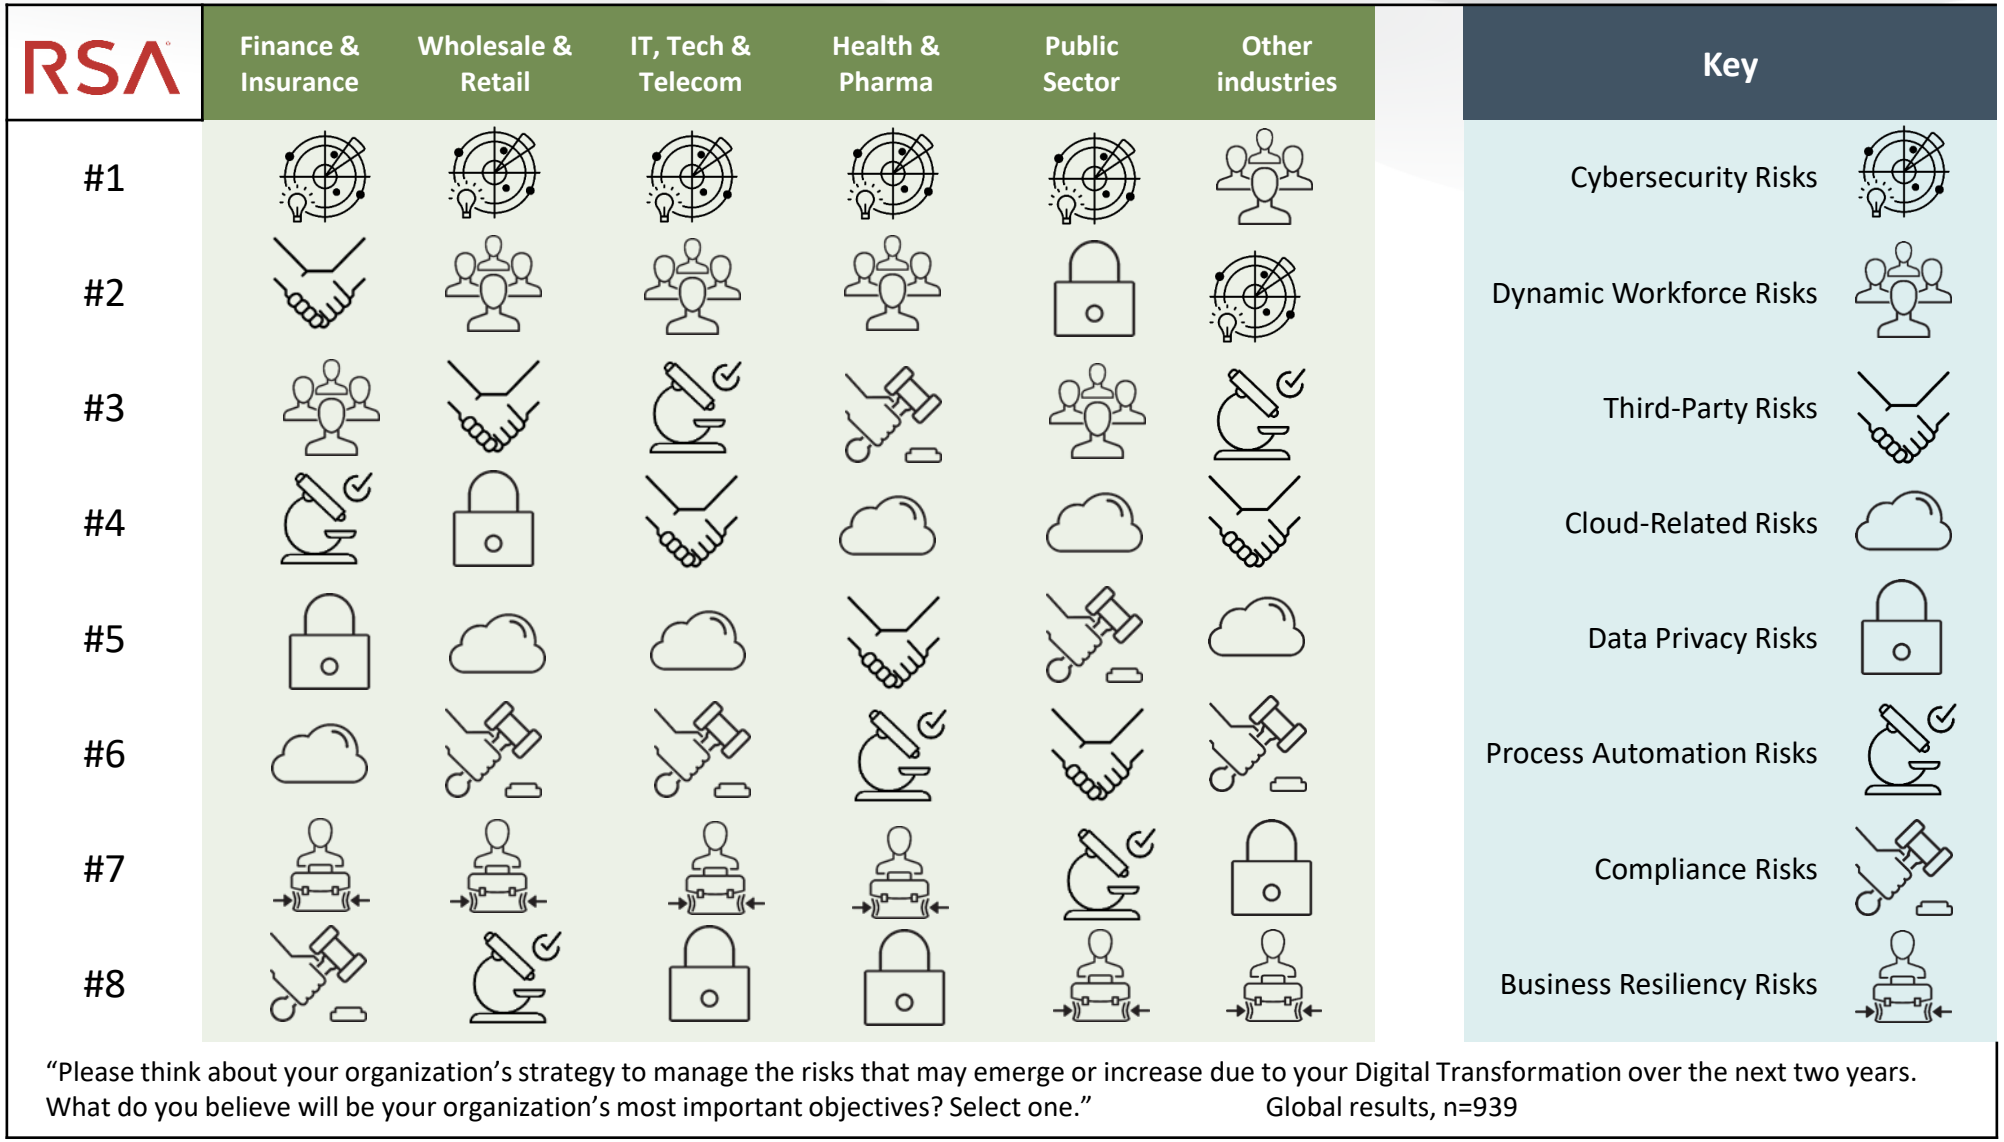
n=600 North America Results

Steps Taken to Manage Digital Risks



"What steps has your organization already taken to manage the risks that have emerged or increased as a result of your digital transformation? Select all that apply."

n=583 North America Results



"Please think about your organization's strategy to manage the risks that may emerge or increase due to your Digital Transformation over the next two years. What do you believe will be your organization's most important objectives? Select one." Global results, n=939

FINAL THOUGHTS

PROTECT YOUR DIGITAL FUTURE

with a unified approach to advanced security operations & integrated risk management

SECURE USER ACCESS & PREVENT FRAUD

in today's digitally connected, multi-cloud, omni-channel world

CREATE A TAILORED PLAYBOOK

to assess, quantify and mature your Digital Risk program over time
