**THE FREEDOM TO WORK WHERE LIFE TAKES YOU**

# MOBILE DOCUMENT PRODUCTIVITY SUITE

**With SmartOffice you can easily view, edit, create, print, present and share Microsoft Office and PDF documents via your mobile device.**

SmartOffice is a lightweight and easy-to-use mobile document productivity suite available as an SDK or as a mobile app. View, edit, create, print, present and share Microsoft Office and PDF documents via your mobile device. SmartOffice has been designed to provide an intuitive easy-to-use mobile workflow, perfect for today's on-the-go world.

## Intuitive User Interface

SmartOffice has been designed to provide an intuitive, easy-to-use workflow with a sleek look inspired by the familiar UI of a desktop Office document. SmartOffice 3.0 offers powerful features with an enhanced user experience.

## Product Features

### Common Features across all file formats

- View, edit, create, share, and save MS Office documents swiftly and accurately
- Editing: copy, cut, paste, undo, and redo
- Formatting: bold, italics, underline, font style, size, color, and highlight
- Documents may be saved in original file format or converted to PDFs
- Safely share through your chosen enterprise mobile security platform
- Password protection – open, edit and save password-protected files (docx, xlsx, pptx only)
- View and insert all major image types (JPG, PNG, GIF)
- Screen display adapts to fit smartphone or tablet screen and supports multi-touch gestures
- All file formats include templates to aid new document creation
- Wireless printing supports thousands of printers
- Support for 37 languages (localized for 17)

### Word

- Paragraph formatting: indent, alignment, bullets, and numbering
- Track Changes for Word (docx only) (PRO feature)
- Insert images, shapes, and graphics
- Support for tables, shapes, and charts (display)

### Spreadsheets

- Multiple worksheet support; add/delete sheets
- Chart display and hundreds of formulas

### PowerPoint

- Comprehensive text, paragraph, content formatting
- Shapes, images, textbox editing
- Insert images, shapes, and graphics
- Slide management and reordering
- Slideshow: present directly from your mobile device

### PDF

- View, annotate, highlight & share PDF documents
- Supports PDF Acro-Forms – fill, view, save and share form content (PRO feature)
- High-security redactions allow you to securely and permanently remove confidential text from documents
- Sign and authenticate PDFs with our Digital Signature tool

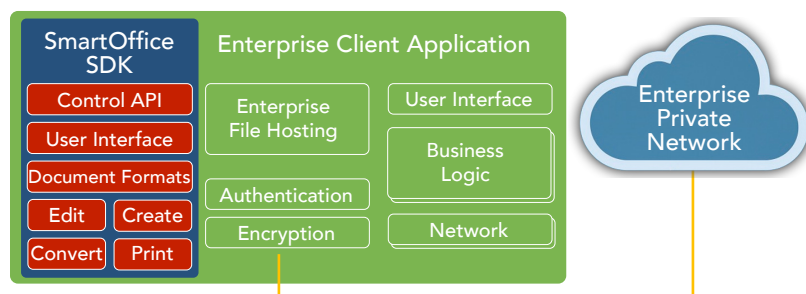

# EMPOWER YOUR MOBILE WORKFORCE WITH SMARTOFFICE SECURABLE SOLUTIONS

**Get your mobile workforce up and running quickly and efficiently while ensuring the security of your enterprise document workflow.**

SmartOffice offers a variety of solutions that can be securely incorporated into your enterprise document workflow platform. The SmartOffice SDK seamlessly and securely integrates with your EFSS, MDM or EMM environment, while the SmartOffice mobile app can be wrapped in an enterprise security platform.

## Solve the BYOD Dilemma

When integrated into your company's mobile security environment, SmartOffice provides a safe way for mobile users to work with MS Office and PDF documents regardless of device. Users can view, edit, print, share and present documents on iOS and Android devices within your security platform. Enterprise information is secured while employees remain productive while on the go.

**SmartOffice** is designed for today's mobile devices. The small download size ensures fast loading and high-quality performance. SmartOffice delivers the truest, most accurate representation of MS Office documents and PDF available on a mobile device.

## Enterprise IT Control and Customization

SmartOffice SDK provides all the functionality and features of our SmartOffice app, secured within the enterprise's encrypted network. Enterprise IT departments can prevent data breaches via SmartOffice SDK controlled access permission tools and customizable document editing controls, that extend down to the user or document level.

For further security, SmartOffice SDK also provides a version that allows only non-editable, view only versions of documents.

Secure permissions that protect potential abuses include:

- Email/sharing file restrictions
- Editing and PDF export
- Save As
- Clipboard access (copy/paste restrictions)
- Camera and image/photo selection
- Printing

**Securely access documents through your organization's security platform. Your corporate data is never exposed to vulnerable files or applications.**

## SMARTOFFICE PRODUCT GUIDE

SmartOffice develops a variety of products that can be incorporated into the enterprise document workflow platform.

- SmartOffice Mobile App
- SmartOffice Viewer (view only)
- SmartOffice SDK
- SmartOffice SDK Viewer
- File Viewer DevKit
- Page Viewer DevKit

<b>Page Viewer DevKit</b> <i>Contact Artifex for licensing info</i>	<ul style="list-style-type: none"><li>• Non-interactive data acquisition library providing page and thumbnail rendering for office documents</li></ul>	<ul style="list-style-type: none"><li>• Projector, printer applications – embedded thumbnails</li><li>• Server-side – full page renderer suitable as a plug-in component for web-based document viewing and similar uses</li></ul>

## THE ARTIFEX ADVANTAGE

Over 150 OEM partners representing some of the biggest names in technology depend on Artifex software solutions. We partner with leaders, building long-term relationships on the basis of strong technical knowledge, outstanding service and a commitment to invest in our partnerships.

Artifex is dedicated to providing prompt and professional technical support and consulting services to our customers. We are deeply committed to product quality and service. When you partner with Artifex, you are assured direct access with the engineers who built the product.

## FLEXIBLE LICENSING

SmartOffice is available under an Artifex Commercial License. We craft each license based on the individual use case. Please contact the Artifex to learn more about our commercial licenses.

**For more information visit [artifex.com](http://artifex.com) or contact [sales@artifex.com](mailto:sales@artifex.com)**

## SMARTOFFICE MOBILE APPLICATION

A full-featured app that serves as an alternative to MS Office 365. SmartOffice can be downloaded from the AppStore or GooglePlay for personal use, or be wrapped in an enterprise security platform to enable secure viewing, editing, creating, sharing, printing and presenting documents on mobile devices.

### Key Features Summary:

- **Lightweight:** Our small footprint is roughly 1/30th the size of Office 365 Mobile
- Handles all MS Office file types plus PDF, and images, on iOS and Android
- Accurate Office document representation on a mobile device
- The scalable display automatically adapts to optimize for device screen sizes
- Wrappable within a variety of MDM, EMM, EFSS platforms

## SMARTOFFICE SDK

A full-featured, customizable SDK component solution for enterprise document workflow management. SmartOffice SDK has all the features of the SmartOffice app but allows companies to customize functionality based on security requirements and needs.

### Key Features Summary:

- Easily and fully integrates into a company's chosen EFSS, MDM or EMM environment, requiring only one integration per platform.
- Provides enterprise IT departments with tools to control document access, viewing and editing across multiple platforms, reducing data leakage and vulnerability to theft, hacking, and malware.

## FILE VIEWER DEVKIT (FVDK)

The FVDK provides code that can be used to build your own viewer in another product or your own embedded system. The code enables you to open/close files, to move forward/backward pages, and to render those pages to bitmaps that the caller can then display. FVDK does not include a UI.

## PAGE VIEWER DEVKIT (PVDK)

The PVDK provides the ability to build an internal viewer that can return an image or thumbnail of every page in a document. Like the FVDK, there is no UI. Unlike FVDK, PVDK does not render to the screen; it simply returns an image of document pages.
