

FISCHER IDENTITY

# STRUCTURED IDENTITY<sup>®</sup> 1.0

**The Affordable, Enterprise-Grade Identity Management Solution Made for Small to Medium Sized Institutions**

## A Full Featured, Best Practice, Out of the Box Identity Solution

We understand the challenge of deploying Identity. Time consuming discovery, arguments, politics, and budget constraints. That is why we built **STRUCTURED IDENTITY**. It's an end-to-end, pre-built solution that lays the foundation for your Identity Core and the future of your organization.

The Identity Core is essential to the success of your identity program. Automatic exports from your source of authority, determining Identity type, evaluating every user against core Student, Faculty, Staff, Alumni and Applicant policies, automatically provisioning them, automatically notifying them with onboarding instructions, providing a secure and extensible (self-service) Identity claiming process that includes mobile device registration and multi-factor enablement and enforcement is the core of every Identity solution. And, **STRUCTURED IDENTITY** is that core.

We've designed the most efficient, focused and right-sized solution that empowers you to configure a working solution with the agility to adapt to your business.

**STRUCTURED IDENTITY** provides you with:

- A structured data model to help you clean up your unstructured source data
- A role-based access control structure for Students, Faculty, Staff, Alumni and Applicants
- Automated life cycle provisioning/de-provisioning for Active Directory, Office 365, Google (G-Suite), Blackboard or Canvas
- A hardened governance & security policy structure for your service desk employees to ensure separation of duty
- Out of the Box multi-factor authentication via Microsoft/Google Authenticator (TOTP)  
Note: If you currently use Duo, we will integrate Duo into your life cycle processes for accessing Fischer Identity's self-service IAM portal. We've also included automated provisioning of your Duo accounts so you don't have to manually add users anymore.
- Identity claiming process for self-service onboarding of your identities
- Password management solution, including self-service based password reset (with MFA) and also includes NIST recommended password policies to provide for ultimate security
- An affordable strategy to move your identity program to the cloud

**ANNOUNCING  
STRUCTURED IDENTITY<sup>®</sup> 1.0  
NOW AVAILABLE!**

## A Working Solution in Less Than 30 Days!

Yes, you read that right, the first day we engage with you, you will have a functioning automated life cycle management solution in your test environment. We can then have you ready for production in less than 30 days, putting you in control of your migration timeline!

**STRUCTURED IDENTITY** is an out of the box solution that enables a 30-40% reduction in implementation time to production as opposed to the traditional time consuming IGA discovery process that is too long and too expensive in both time and money.

**STRUCTURED IDENTITY** is the first step to finding the time needed to expand your vision for your identity program.

## The Most Affordable Fully Featured and Scalable Identity Management Solution

Time is money, but money is money too. **STRUCTURED IDENTITY** provides savings in implementation time but it also saves your budget by realizing savings of more than \$30,000. We are proud to provide, to our partners, an affordable, enterprise-grade lifecycle management solution.

## Fischer Identity - Over 1,000 Deployments For Higher Education and More Than 15 Years Experience Building Full-Suite IGA Solutions

Fischer Identity has built **STRUCTURED IDENTITY** on the back of our extensive years of experience. We have been tracking requirements and needs of our higher education customers to construct, what we call, the Identity Core for higher education. This Identity Core is comprised of your domain, email system(s), your LMS and your source of authority. **STRUCTURED IDENTITY** is the automated solution that may have been beyond your reach in the past but Fischer Identity created **STRUCTURED IDENTITY** to address the largest portion of the education market that faces challenges to find the time, people and funds to construct an enterprise identity solution.

If you are a community college, or an institution, with up to 5,000 student FTE (Faculty, Staff, Alumni are included up to 10x your student FTE account), then give us a call. **STRUCTURED IDENTITY** is the solution that is affordable and will provide you with enterprise grade identity & life cycle management in less than 30 days.

# ACCESS GOVERNANCE

## Provides You With The Control And Scalability You Need

A Full Suite Access Governance Solution To Control Your IAM Program and Your Business

1

### Dynamic Authorization

Work with us to define next generation access governance that can automatically enforce privileges and permissions across your IAM Program without the need to change anything.

2

### Control Who Has Access

Our ABAC-driven governance model empowers you to control your identities. You can control who has access to what by dynamically authorizing which resources identities are allowed to request access.

3

### Compliance

The most significant reason organizations deploy identity governance and administration technology. Gain the granular analytics and transparency, auditing and reporting necessary to maintain compliance.

4

### Continuous Monitoring

Control the most sensitive entitlements within your organization. Defense in depth is key to a successful and controlled identity governance program. Add continuous monitoring for granular governance.
