Information Security Training

Information security is critical to the operation and survival of every organization across all business sectors. ISO/IEC 27001:2013 is the only auditable international standard that defines the requirements for an Information Security Management System (ISMS). This standard is designed to ensure that the appropriate security structures are in place to protect an organization's people, products, and proprietary information. BSI also provides training solutions on information security frameworks that will help your organization to define policies and procedures around the implementation and ongoing management of information security controls.

Note: We can provide training on the specific controls within ISO/IEC 27000-series based on the needs of your organization.

ISO/IEC 27001:2013

Internationally recognized ISO/IEC 27001 is an excellent framework which helps organizations manage and protect their information assets, so they remain safe and secure. It helps you continually refine the way you do this, not only for today, but also in the future.

Available courses:

- Fundamentals of ISO/IEC 27001
- Requirements
- Internal Auditor
- Lead Auditor

ISO/IEC 27701:2019

This standard is an extension of ISO/IEC 27001:2013, and it is designed to specify the requirements and provide guidance for establishing, implementing, maintaining, and continually improving a privacy information management system (PIMS) within your organization.

Available courses:

- Requirements
- Internal Auditor
- Implementation

More Information Security Training

ISO/IEC 27017:2015 Information Security Controls for Cloud Services

This course helps you clearly identify who is responsible to manage the different security risks and ensure the appropriate cloud security controls are in place so you can maintain a resilient Information Security Management System (ISMS).

ISO 22301:2019 Business Continuity Management

The requirements, internal auditor, and lead auditor training courses will give you an understanding of the concepts and principles of the ISO 22301:2019 standard. You will also learn the best practices to audit your organization's business continuity management system as you aim to anticipate and prepare for a variety of business challenges and threats.

ISO/IEC 27002:2013 Information Security Controls Implementation

This course aims to assist organizations to implement the commonly accepted information security controls, either as part of an ISO/IEC 27001 information security management system or as a standalone activity.

NIST Cybersecurity Framework Implementation

By attending this two-day course, you'll understand how to use the NIST Cybersecurity Framework to assist your organization to prevent, detect, and respond to cyberattacks. You'll learn how to apply a 7-step approach to implement the framework and continuously improve your cybersecurity practices.

ISO/IEC 27018:2019 Protecting Personally Identifiable Information (PII) in Public Clouds

This course is aimed at assisting cloud service providers and their customers understand the additional guidance and controls contained within ISO/IEC 27018. The additional controls will enable providers and their customers to comply with any applicable legislation and regulations, and better protect information when processing PII in the cloud.

CMMC Training Courses

The Cybersecurity Maturity Model Certification (CMMC) is a standard by the U.S. Department of Defense (DoD) intended to better protect controlled unclassified information. The DoD requires that contractors and subcontractors be certified to CMMC in order to do business in the Defense Industrial Base. Knowledge of the CMMC standard provides increased assurance that your organization can adequately protect sensitive unclassified information in accordance to DoD standards. **BSI is a licensed training provider for CMMC.** We offer a variety of courses to help your organization understand the CMMC requirements to become compliant.

CMMC Essentials

This one-day course provides a general understanding of the concepts of Cybersecurity Maturity Model Certification (CMMC) and examines issues surrounding the requirements for Department of Defense (DoD) suppliers.

CMMC Third-Party Assessor Organizations (C3PAOs)

This course will help individuals working for defense contractors, consultants, and assessors working for C3PAO's understand the applicable legal cyber requirements, information they must protect, and the large volume of source and reference documents. You will also gain a clear understanding of each CMMC level and the skills needed to implement an effective and CMMC conforming system.

CMMC Certified Assessor Level 1 (CCA-1)

This course will help you identify the Cybersecurity Maturity Model Certification (CMMC) standard, relevant supporting materials, and applicable legal and regulatory guidance as it pertains to the Department of Defense's (DoD) Cybersecurity posture.

CMMC Certified Assessor Level 3 (CCA-3)

This course builds on the concepts and materials from the CMM Certified Assessor Level 1 training. Using case studies and other interactive tools, you will learn how to conduct a Level 3 CMMC assessment.

Training delivered the way you want

Training is rarely a one-off need and BSI can help you along every step of the journey.

From everyday training needs to ongoing skills development and support, we provide business-wide training programs. Depending on your requirements, we can deliver training in various formats.

Online training for complete flexibility

- Training online can help you nurture talent from within your organization, from wherever you're located.
- Hosted in virtual classrooms, you can engage with instructors and each other, to help properly embed best practices within your organization, and ensure you're ready for any challenge.
- You can study from anywhere in the world and still benefit from trusted expertise, all with languages and at times to suit you.
- And without the need to travel, training online also helps all of us to be more sustainable in the way we work.
- You can join our online training courses with students from other organizations, where you'll network, connect, and learn from shared experience.
- Or an expert BSI instructor can run the same course dedicated to your organization, so you benefit directly from a consistent, flexible approach that provides personal development for your colleagues, no matter where they're located.
- The interactive experience uses the same learning techniques as classroom courses, with activities, breakouts, teamwork, and discussions, so you get the same value, skills, knowledge, and learning outcomes.

Your copy of the standard

For standards-based training courses, you will be given a loaner copy of the standard for the duration of your course. We recommend that you are familiar with the content of the standard before the course, and it may be beneficial to bring your own copy so that you can add notes if you choose.

Prerequisites

Some of our courses have specific prerequisites – usually having a working knowledge of the standard is a good starting point. To make sure that you and the other students on your course get the best value from your instructor, please ensure that you meet the entry criteria. Please speak to one of our advisors if you're unsure.

BSI – your partner of choice

Working in 195 countries, we pride ourselves on the expertise, integrity, and professionalism of our people. We help clients 'make excellence a habit' and aspire to be the business partner of choice.

We deliver a diverse portfolio of standards, qualifications and training, certification, advisory, and supply chain solutions to improve business performance. BSI's solutions can help organizations improve performance, manage quality and risk, protect brands, and create a foundation for Organizational Resilience.

We look forward to working in partnership with you.
