

# Leader in Intelligent Identity & Access Security

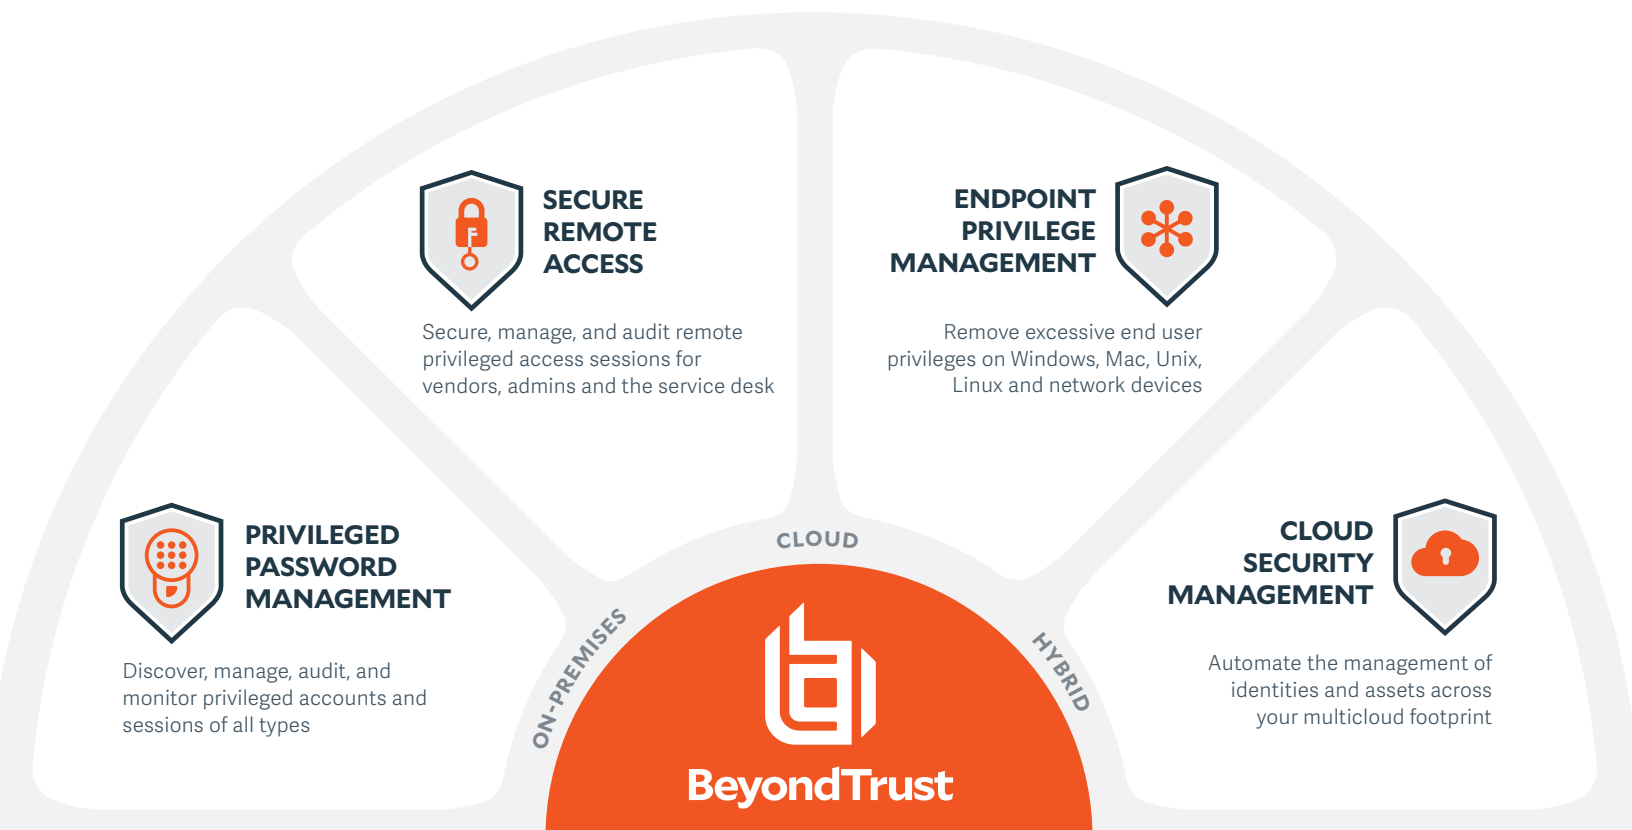

PROTECT IDENTITIES AND ACCESS FROM CYBERTHREATS

BeyondTrust is the worldwide leader in intelligent identity and access security, empowering organizations to protect identities, stop threats, and deliver dynamic access to empower and secure a work-from-anywhere world.

## Protect All Identities, Access, And Endpoints In Your Environment

Our integrated products and platform offer the industry's most advanced privileged access management (PAM) solution, enabling organizations to quickly shrink their attack surface across traditional, cloud and hybrid environments.

## Security Solutions That Drive Your Business

BeyondTrust protects identities and critical access from security threats while creating operational efficiencies. Our integrated platform delivers fast time to value with solutions that are not only simple to deploy but also enable a superior user experience.

### Privileged Password Management

- Discover, categorize and auto-onboard all privileged accounts
- Manage, record, audit and monitor privileged session activity
- Control access to secrets and privileged credentials used by applications, tools and other non-human identities

### Endpoint Privilege Management

- Eliminate local admin rights across all endpoints quickly with out-of-the-box Quick Start policies
- Stop ransomware attacks by enforcing least privilege and controlling applications
- Achieve compliance by removing excess privileges, whitelisting applications, and providing an audit trail of user activity

### Secure Remote Access

- Enable vendor and remote access with comprehensive features designed to maximize productivity
- Connect from anywhere, to anywhere, to any device – no VPN required
- Achieve compliance with unimpeachable audit trails and reports

### Cloud Security Management

- Discover, visualize and manage all permissions across multicloud environments
- Adjust entitlements across multicloud platforms from a single interface
- Leverage recommendations to control excess privileges and provide the right level of access

## Use Cases

Defend against threats related to stolen credentials, misused privileges, and unwanted remote access.
