

HOW TO

GAIN A COMPLETE VIEW of your VENDOR ECOSYSTEM with AUTOMATIC VENDOR DETECTION

AUTOMATE AND SCALE YOUR THIRD-PARTY RISK MANAGEMENT WORKFLOWS

SecurityScorecard is the global leader in cybersecurity ratings, empowering you with trusted data and the confidence to make smarter and faster decisions. Security ratings give you an outside-in view of the cybersecurity posture of any organization in the world across ten key risk factor groups. Our Automatic Vendor Detection (AVD) instantly gives you a view of your entire third and fourth-party ecosystem, enabling you to visualize and take proactive steps to mitigate risk.

01. Visualize your full 3rd and 4th party ecosystem

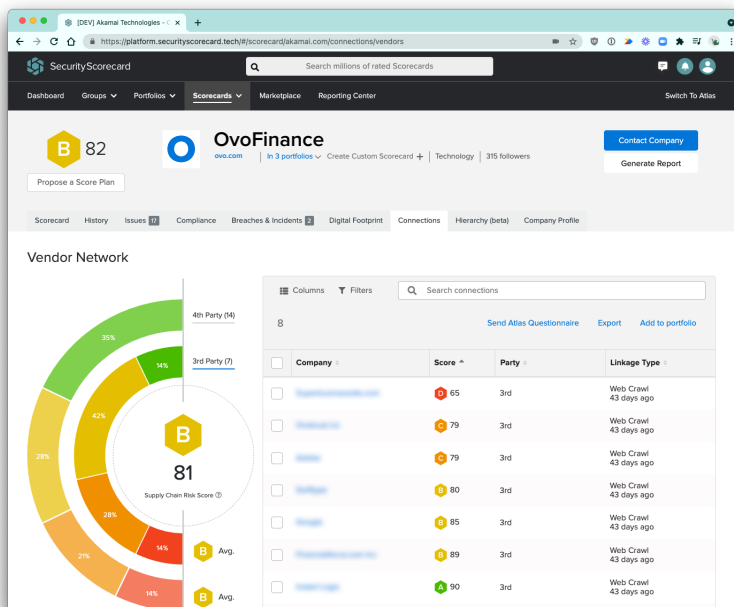

Gain a ubiquitous view of cyber risk with unparalleled graphics giving you a full view of your ecosystem risk.

02. Drive targeted discussions with your supply chain

Pinpoint risks and specific vulnerabilities within every vendor, so you can partner with your third parties to accelerate risk mitigation.

03. Streamline vendor risk management workflows at scale

Automate third-party risk management workflows based on trusted data and drive business growth.

7-8 POINT
SCORE IMPROVEMENT FOR INVITED
VENDORS

WHAT IS A SUPPLY CHAIN RISK SCORE?

Your security posture is never just your own security posture. It's a combination of yours, your vendors, and their vendors that make up an entire ecosystem.

SecurityScorecard's **Supply Chain Risk Score** calculates the combined risk of an organization and its entire digital supply chain. This takes into account multiple parameters, including infrastructure, paths to an organization, and how much risk each vendor can pose.

The **Supply Chain Risk Score** provides visibility into combined ecosystem risk, enabling you to understand and stay ahead of supply chain threats.

AUTOMATIC VENDOR DETECTION ENABLES YOU TO

VISUALIZE 3RD AND 4TH PARTY RISK

Uncover 3rd and 4th party risk to understand potential impacts to your organization

COLLABORATE WITH THIRD PARTIES

Invite your vendors to view their Scorecard, generate a plan, and improve their security posture.

DISCOVER UNKNOWN VENDORS

Automatic detection of vendors in your ecosystem with the ability to continuously monitor digital supply chain risk in one dashboard.

AUTOMATE DATA-DRIVEN WORKFLOWS

Build custom workflows based on score changes and take proactive action to mitigate risk.
