

The eSentire Difference

We're the Authority in Managed Detection and Response Services. Here's why over 1000 organizations globally have entrusted their security services to eSentire.

eSentire MDR is not about alerts, it's about delivering superior security outcomes.

We provide complete, multi-signal Managed Detection and Response with 24/7 protection against cyber attackers that bypass traditional cybersecurity controls.

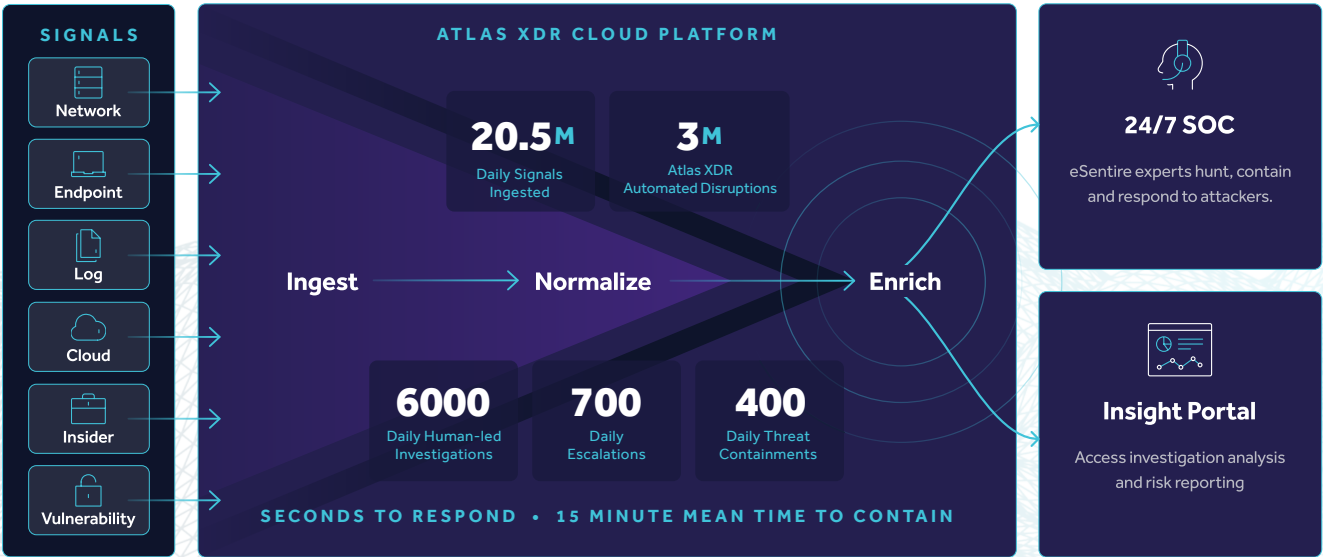

Our Difference	Multi-Signal Ingestion	24/7 Threat Hunting	Atlas XDR Cloud Platform	Rapid, Robust Response	End-to-End Managed Support
Your Outcome	You gain full threat visibility with deeper correlation and investigation capability, strengthening our Response, and Time to Contain.	Zero-Trust approach to hunt and identify elusive attackers. Gain 24/7 proactive, automated blocks of malicious intent plus Elite Threat Hunting support.	Rapid detection and automated threat disruptions. We deliver proactive Security Network Effects so you benefit from detections across our global customer base.	Minimized attacker dwell time. We disrupt, isolate and contain threats before they impact your business operations.	Alleviate expertise gaps and resource constraints. Minimize and quantify your risk with Managed Risk, MDR, Digital Forensics and IR expertise.

How We Hunt 24/7

We operate with a zero-trust philosophy to defend your business from evolving threats. Our cloud-native XDR platform, eSentire Atlas, provides processing scale and speed to combat emerging threats by ensuring that new detections across every customer environment are immediately translated to protect our entire global customer base. We call that the eSentire Security Network Effect.

eSentire Atlas is the foundation of our MDR service, providing security, reliability and redundancy at scale, and on-demand. Leveraging patented Machine Learning models and proprietary artificial intelligence threat hunting applications, Atlas automatically disrupts over 3M threats daily. When an automated disruption isn't possible, Atlas arms our 24/7 Security Operations Center Analysts and Elite Threat Hunters with the enriched intel to perform deep investigations and execute manual containment, when required, in minutes.

The Result? We stop threats before they impact your business.

Multi-Signal MDR Matters

At eSentire, we believe a multi-signal approach is paramount to protecting your complete attack surface. Whether your environment is in the cloud, on-premises or somewhere in between we have the visibility to see what other MDR providers will miss. We ingest Endpoint, Network, Log, Cloud, Email, Identity, Managed Vulnerability and Insider sources, enabling full visibility, deep investigation, data correlation and most importantly, complete response.

Not all MDR is created equal
