

Safeguard what matters.

DryvIQ provides a platform and suite of products that employ modern advances in artificial intelligence and machine learning technologies to seamlessly unify three core dimensions of enterprise data management—providing a single platform to discover, migrate and govern unstructured data across all connected content systems.

- ✓ Access and discover enterprise content within any connected source
- ✓ Identify and detect sensitive data and documents
- ✓ Audit and remediate sensitive document labels
- ✓ Automate policy enforcement to make content "actionable"
- ✓ Continuous governance and oversight to safeguard content

Trusted by over 1,100 companies across the globe

Enterprise Data Management Platform

- ✓ 80%+ of enterprise data is unstructured and growing year-over-year by 50%.

DryvIQ empowers organizations to **identify, organize, analyze, and safeguard their enterprise content** by providing a holistic platform that enables the automated remediation and orchestration of content across information silos to support regulatory compliance, enhance business productivity, and mitigate corporate risk.

A.I.-powered EDM platform providing a unified experience to safeguard enterprise content and reduce corporate risk.

Discover

Identify and discover content across all connected systems, enabling the classification of sensitive, critical, and intellectual data.

Migrate

Intelligent and highly scalable enterprise content migration—resulting in informed transfers and minimal end-user impact.

Govern

Enforce automated rules-based actions to safeguard content to avoid data loss, enable compliance and reduce financial and brand risks.
