

## Proof of Value – Continuous, Proactive Security

Your PoV is unlimited for 30 days. Assess your entire attack surface; view detailed reports with paths, proofs, and best practices; and take advantage of immediate access to full op reviews with our vCISOs.

## Why APTaaS?

Impacts	
These impacts require immediate attention. They represent critical vulnerabilities that can be leveraged by an attacker to compromise your network.	
<b>1</b> domain	<b>Domain Compromise</b> Compromised 1 domain via 6 separate attack vectors Once a domain is fully compromised, all hosts, domain user accounts, data, infrastructure and applications tied to that domain should be considered fully compromised. Additionally, applications running on a domain-joined machine or any application that uses Active Directory integration to authenticate users should be considered fully compromised. <a href="#">View technical details +</a>
<b>4</b> users	<b>Domain User Compromise</b> Compromised 4 domain users Once a domain user is compromised, anything that user account has access to should be considered compromised. <a href="#">View technical details +</a>
<b>12</b> hosts	<b>Host Compromise</b> Compromised 12 hosts via 33 separate attack vectors Host compromise can lead to attackers gaining access to sensitive information, maintaining persistence within your network, and obtaining lateral movement within your networks. <a href="#">View technical details +</a>

1. Identify internal & external attack vectors that lead to:
  - sensitive data exposure
  - critical systems disruption
  - ransomware risk
  - other critical impacts
2. Verify the effectiveness of your security tools, processes, and controls.
3. Prioritize vulnerabilities and fix actions based on risk and effort.
4. Verify remediation.
5. Report security posture and improvements to board and regulators.

## Why Horizon3.ai?

- Painless - No persistent agents. No provisioned credentials.
- Safe - You configure the scope and attack parameters.
- Continuous & Unlimited - Our SaaS solution is available 24x7. Don't wait months between reports.
- Complete Attack Surface - Coverage for both internal and external attack vectors. From inside or out, we'll find it. Whether your network is on-prem, in the cloud or hybrid, we've got you covered.
- Purple Team Approach - Let us be your purple team partner and help you establish a find-fix-verify loop to improve your security posture.
