## POWERED BY ONETRUST ATHENA™ AI AND BACKED BY ONETRUST DATAGUIDANCE

*Monitor Vendor Data Breaches & Market Developments, Take Automated Actions to Reduce Risks and Improve Performance*

OneTrust Athena AI and robotic automation engine powers Vendorpedia, enabling intelligent risk and performance monitoring on all your vendors. OneTrust DataGuidance™ intelligence backs Vendorpedia, embedding valuable research directly into the platform to help your organization implement third-party frameworks, standards, and controls to comply with the laws that matter most.

# Mitigate Risks and Monitor Performance of Third Parties and Suppliers

## CYBER RISK EXCHANGE

**Access Pre-Completed Assessments.** Access research on thousands of vendors with service- and product-level granularity, including security certifications & pre-completed risk assessments, updated daily

**Monitor Vendor Risks and Performance.** Get alerts on critical vendor security and privacy changes, including 4th-party changes, incidents & breaches, all while using automation to trigger reassessments

**Get Alerted When Vendor Breaches Occur.** Receive notifications about vendor breaches and regulatory enforcements, monitored by our in-house security and privacy team and backed by OneTrust DataGuidance research

## VENDOR CHASING SERVICES

**Offload Assessment-Related Work.** Leverage vendor risk assessment services performed by the OneTrust team to chase vendors on your behalf, offloading work and enabling faster questionnaire completion

**Save Money & Reallocate Resources.** Eliminate repetitive tasks, giving your team the bandwidth to work on high-value projects instead of tracking down assessments

**Automate Custom Questionnaire Completion.** Empower vendors to autocomplete any questionnaire, even custom ones, to speed up assessment response time for vendors, free and available for any supplier to use

## ASSESSMENTS & DUE DILIGENCE

**Identify & Mitigate Risks.** Automate vendor assessments, conduct financial due diligence, monitor SLAs & performance, test controls, and streamline issues & exception management

**Add Business Context to Vendor Risks.** Link your vendors to the IT systems and business processes they support to add context to risk, visualize lineage diagrams, and keep your data map up to date

**Manage Key Contract Terms.** Scan and report on key contract terms, and manage certificates, evidence, and vendor documentation in a single repository, as well as integrate with contract management tools
