

Secureworks® Taegis™ Vulnerability Detection and Response (VDR):

Secureworks' modern vulnerability management solution minimizes the manual effort and eliminates the guesswork from conventional VM

Taegis VDR offers a holistic view of a network's vulnerabilities across machines, connected devices, and web applications. This allows Secureworks to deliver a significantly more meaningful risk score for each vulnerability, one that accounts for each vulnerability's unique circumstances, surrounding environment, and operational context.

Featured resources:

The Importance of Context to Prioritizing Vulnerabilities

Context is key when prioritizing vulnerabilities. Learn why standard vulnerability prioritization models often don't accurately address risk - one of the issues Taegis VDR addresses.

Secureworks' solution collects data on, and analyzes, over 40 factors to generate a meaningful priority list from 1 to n of all vulnerabilities on an enterprise network.

Secureworks customers can build multiple remediation plans and assess how effective each will be before committing resources.

Secureworks has developed a machine-learning based approach to automating the identification of unique assets, a previously manual effort reserved for the most experienced and capable pen testers.

About Secureworks

Secureworks® (NASDAQ: SCWX) is a global cybersecurity leader that protects customer progress with Secureworks® Taegis™, a cloud-native security analytics platform built on 20+ years of real-world threat intelligence and research, improving customers' ability to detect advanced threats, streamline and collaborate on investigations, and automate the right actions.
