30,000-foot view

30,000-foot view: SAP

Hundreds of products across six main portfolio categories

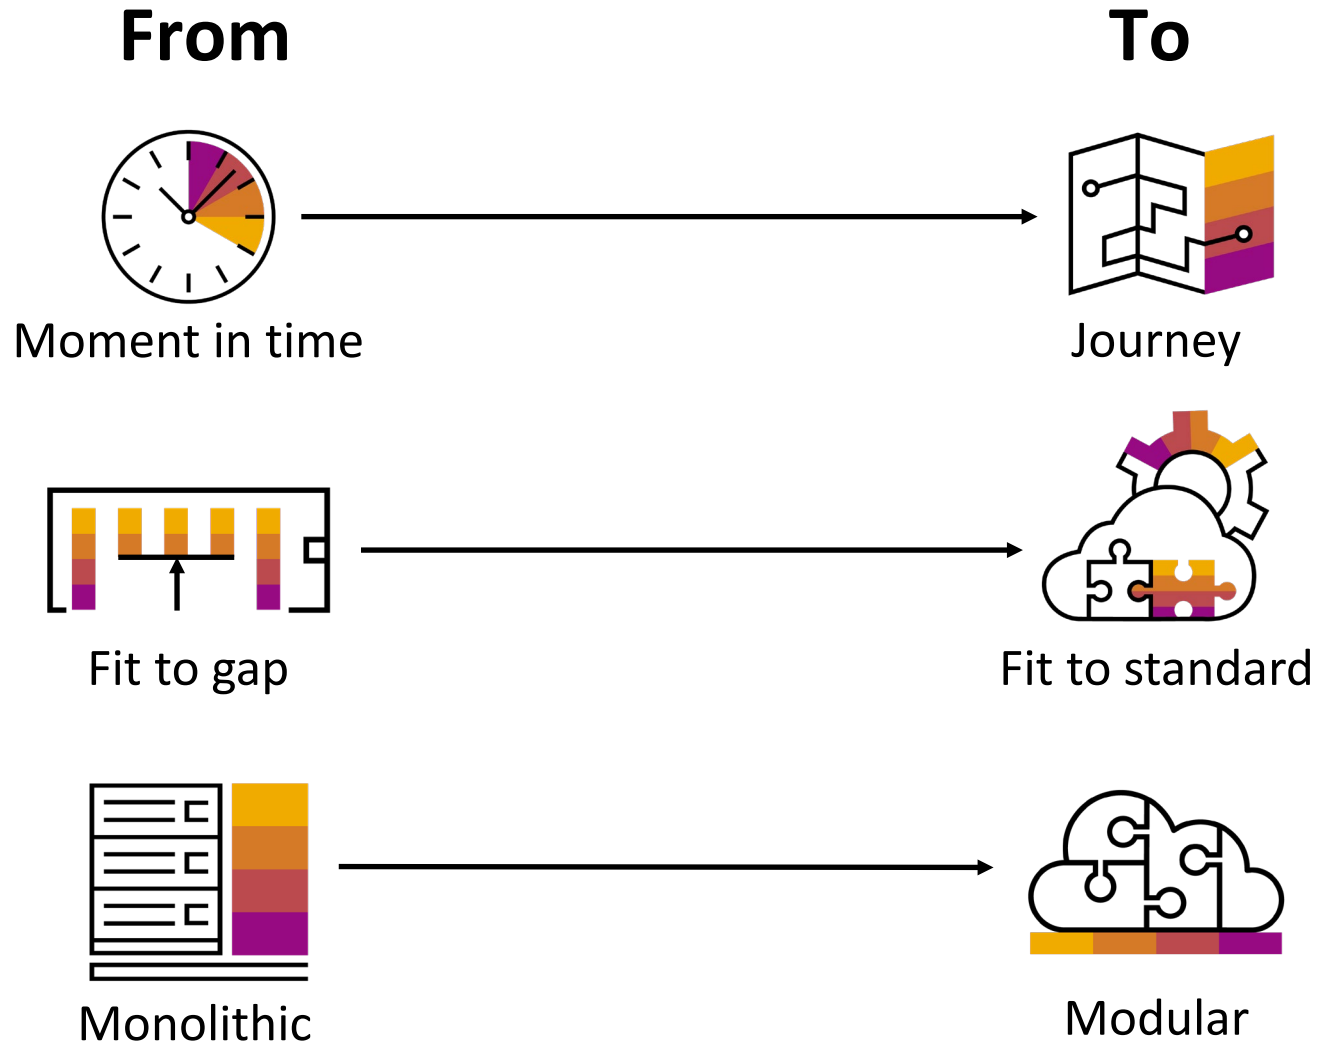

Cloud, On-Premise, Hybrid solutions

Wide range of technologies, programming languages

Mindset Shift

Digital transformation is not
a destination,
it's a continuous journey.

Common Industry Challenges

- Complex, hybrid IT landscapes and increasing technical debt
- Shortage of developers (drives LCNC* trend), shortage of security professionals, and limited time
- Evolving security threats

Security Challenges with Cloud Transformation

Common Industry Challenges

Translated Security Challenges

Complex, hybrid IT landscapes and increasing technical debt

- Security controls must handle a mix of technologies and integration
- Software supply chain risks (third party, open source, dev infrastructure)

Shortage of professionals (especially, on security side), and limited time

- Lack of security culture
- The need for harmonized processes

Evolving security threats

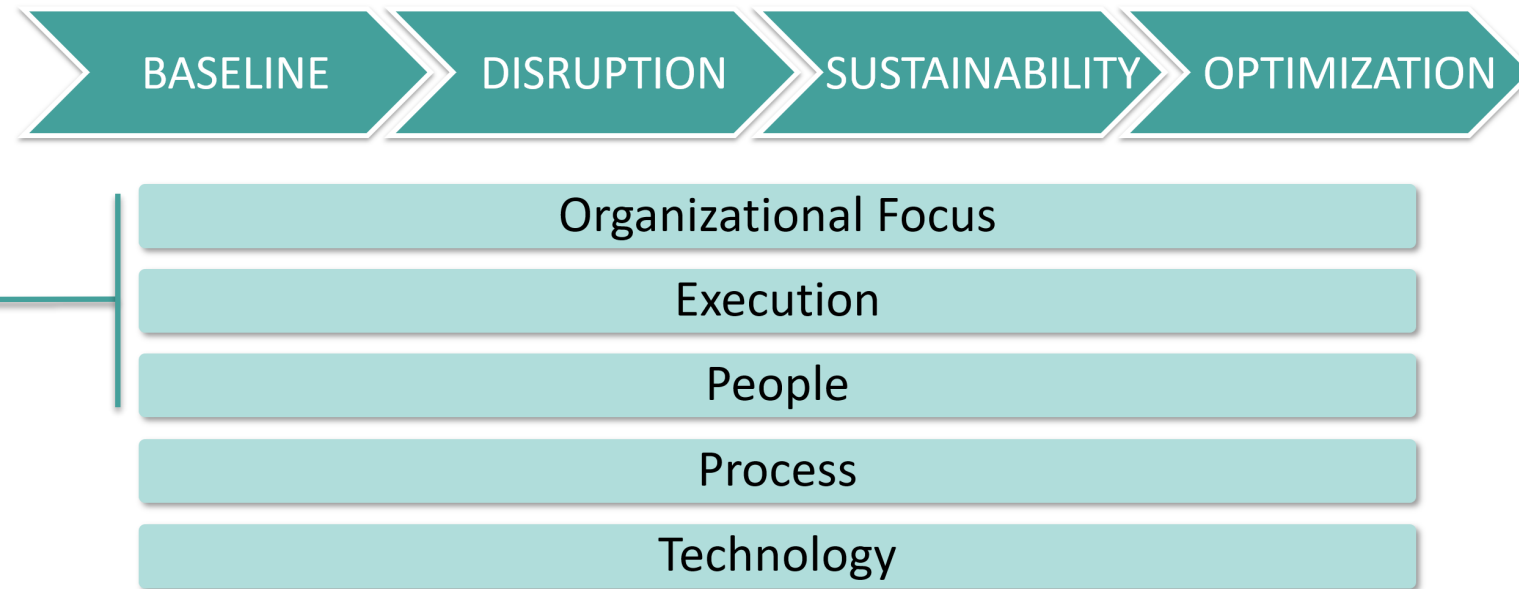

- The need for proactive approach and streamlined response

Working through the Security Challenges with Cloud Transformation

Security Challenge Areas:

1. Security Culture
2. Processes
3. Technology

RSA®Conference2022

Working Through the Transformation

Security Culture

Security Culture

- Security is a matter of quality
- Education, make it fun
- Cybersecurity hygiene
- Continuous improvement
- Risk assessment
- Zero-defect approach
- Testing & validation
- Collaboration, security champions

To develop and operate secure software, we need to change our development culture, looking beyond the technology, at the organization that created it.

The change has to start with **people**.

Security Culture Toolkit: <https://www.sap.com/about/trust-center/security.html?pdf-asset=c8573354-f87d-0010-bca6-c68f7e60039b>

RSA[®]Conference2022

Working Through the Transformation

Processes

Transformation of Security Requirements

Foundational

- Secure against untrusted Input
- Secure Communications
- Secure Identity Management and Authentication
- Secure Cryptography
- Secure Audit Logging
- Secure by default & by design
- Data Protection & Privacy
- Secure Authorizations
- Secure Storage

Cloud security

- Secure against untrusted Input
- Secure Communications
- **Secure Identity Management and Authentication +**
- Secure Cryptography
- **Secure Audit Logging +**
- Secure by default & by design
- **Data Protection & Privacy +**
- **Secure Authorizations +**
- **Secure Storage +**
- **Secure Operations**
- **Secure Multi-Tenancy**

Transformation of Secure Processes

Secure Software Development and Operations Lifecycle (aka Secure SDOL)

From Linear...

Provided foundational guidance for security activities throughout development lifecycle (risk-based approach, recommendations)

To Continuous...

Gen1: Introduced continuous approach towards secure development and operations (risk-based, contract-based requirements, recommendations)

Gen2: Optimized continuous approach towards secure development and operations (contract-based, mandatory requirements, software supply chain safeguards, etc.)

Continuous Compliance

- Controls mapping to:
 - Security requirements
 - Secure Software Development and Operations Lifecycle
- Onboarding procedure
- Accountability (dev teams)
- Centralized support

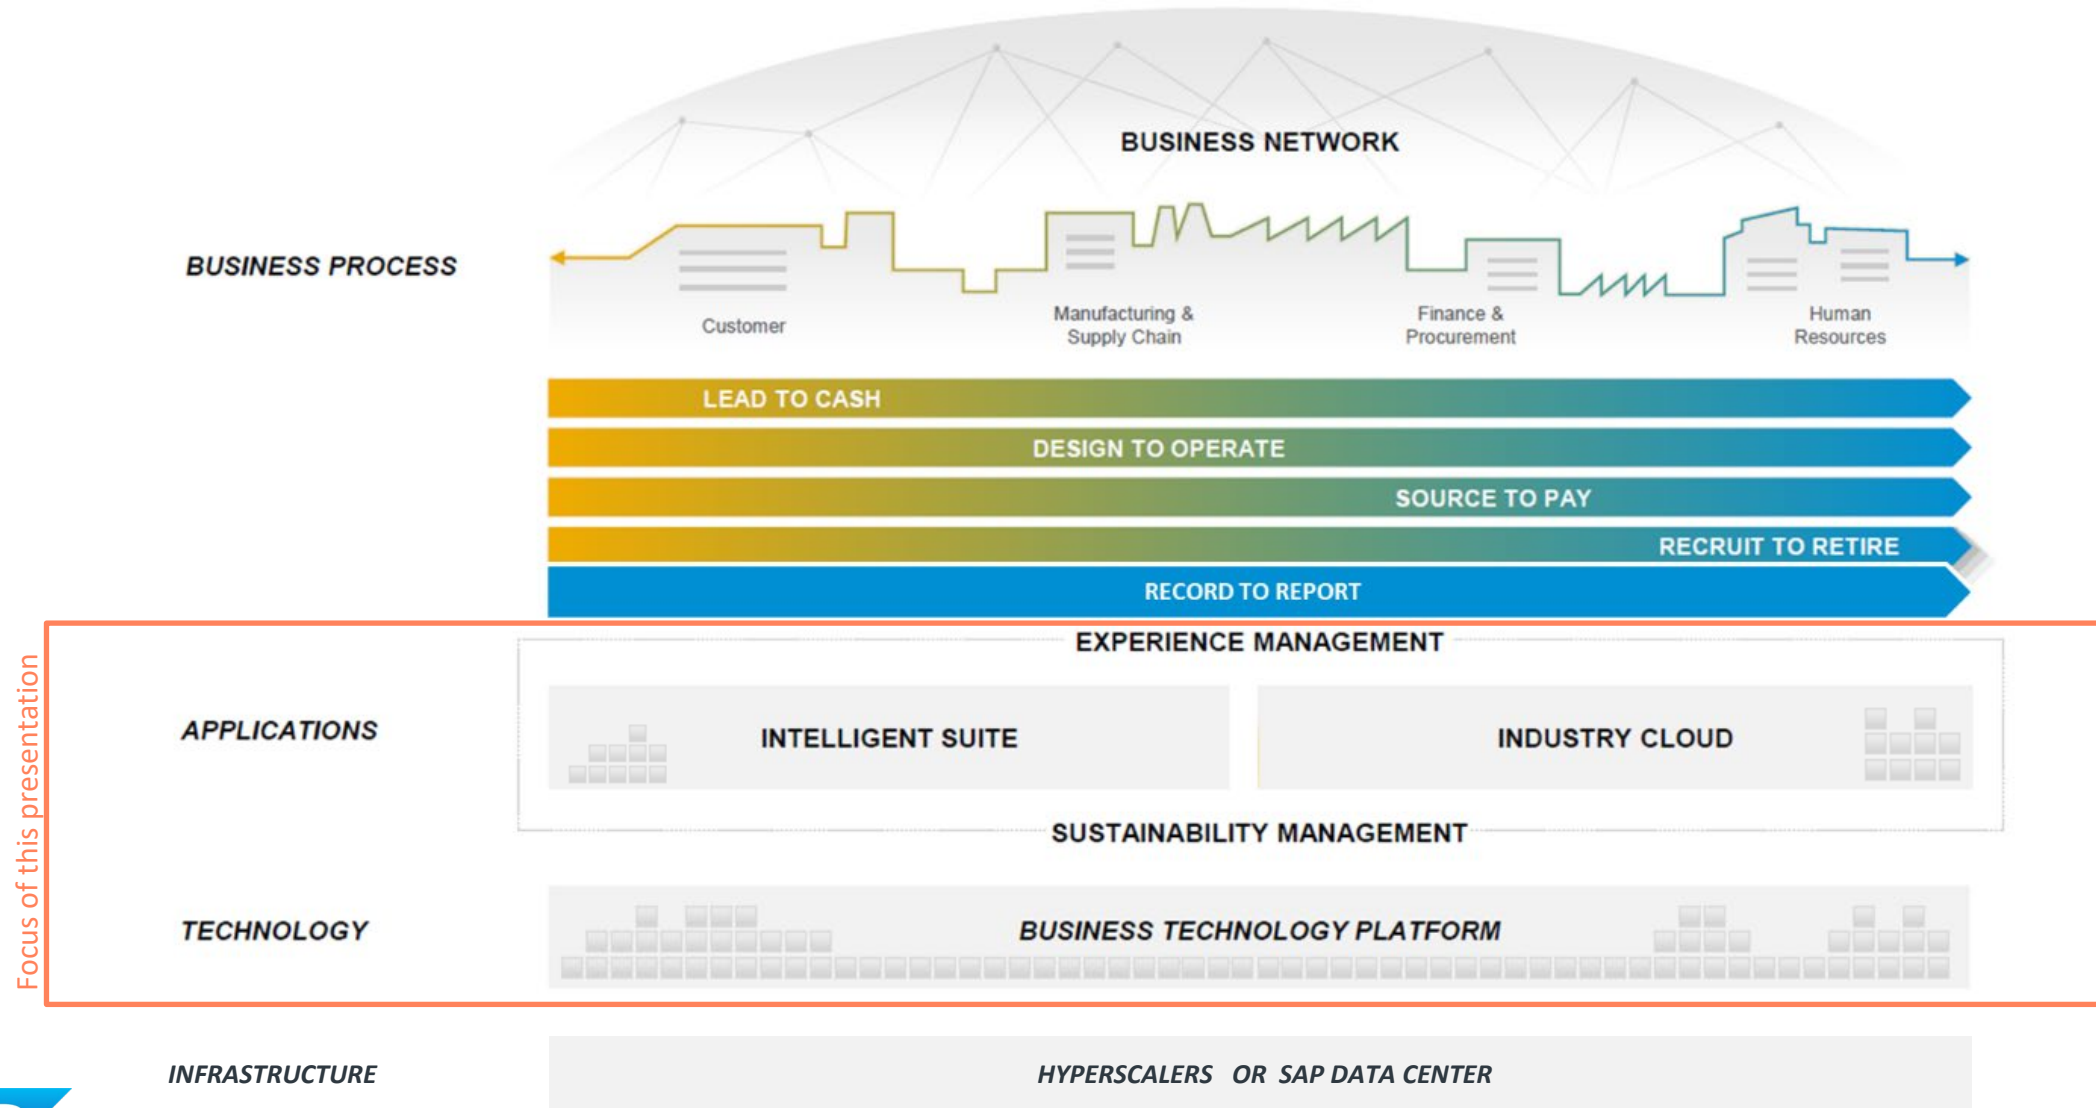

RSA®Conference2022

Working Through the Transformation

Technology

SAP Reference Architecture

Integration through SAP Suite Qualities

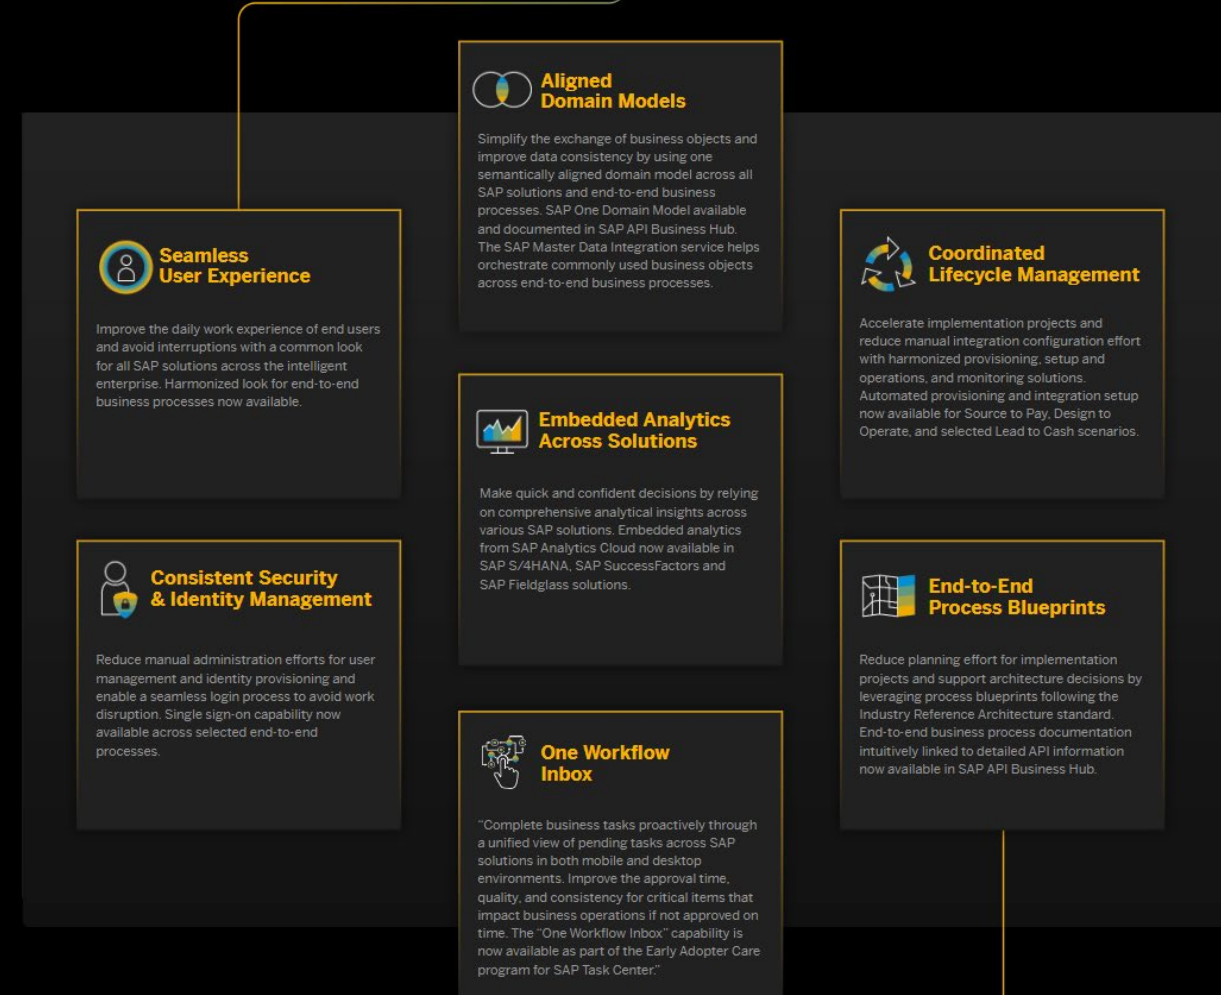

SAP's Cross Product Architecture (CPA) workstreams

- Aligned domain models
- Consistent security & identity management out-of-the-box
- Coordinated lifecycle management

SUITE QUALITIES

Intelligent, integrated enterprises offer a consistent experience along end-to-end key processes. In 2020, SAP introduced distinct suite qualities that characterize SAP's intelligent suite of seamlessly integrated applications.

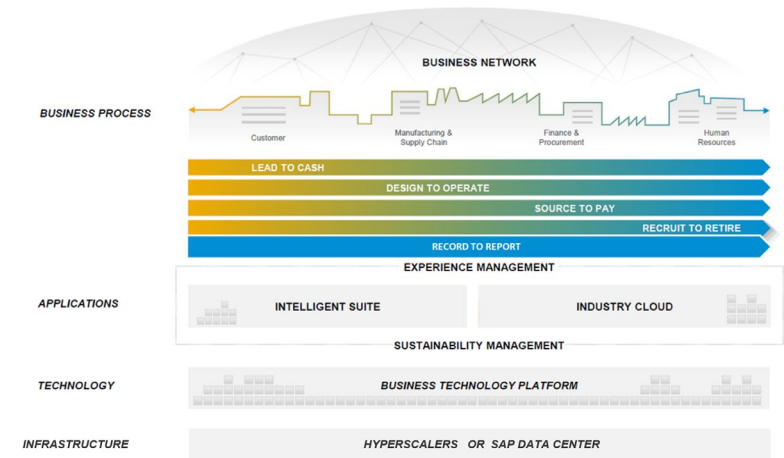

RSA[®]Conference2022

Cloud Transformation and Security

Use Cases

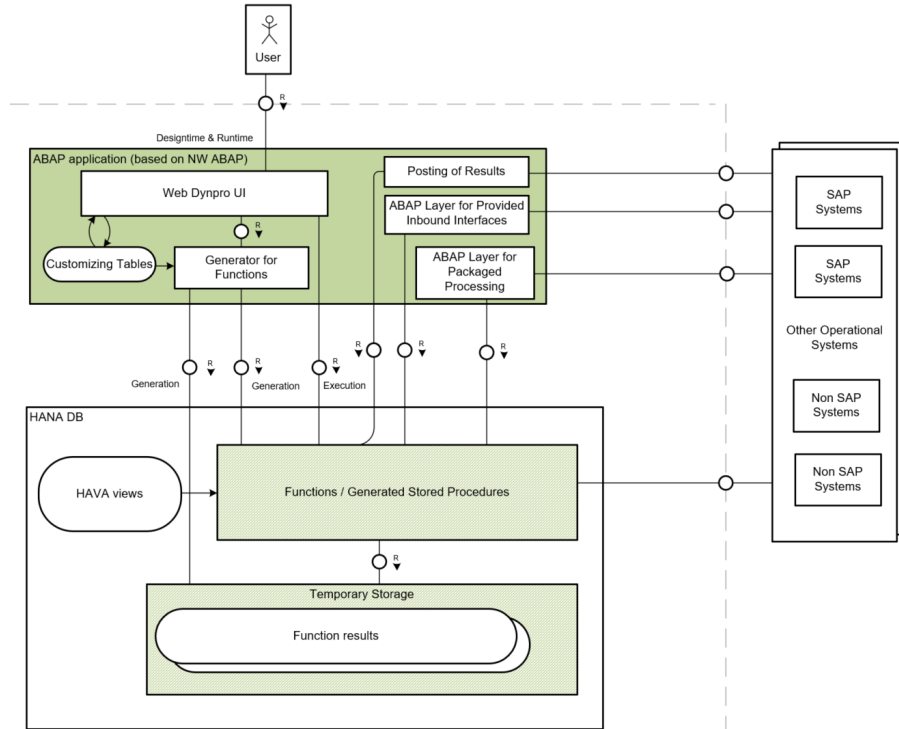

Use Case 1: Intelligent Suite

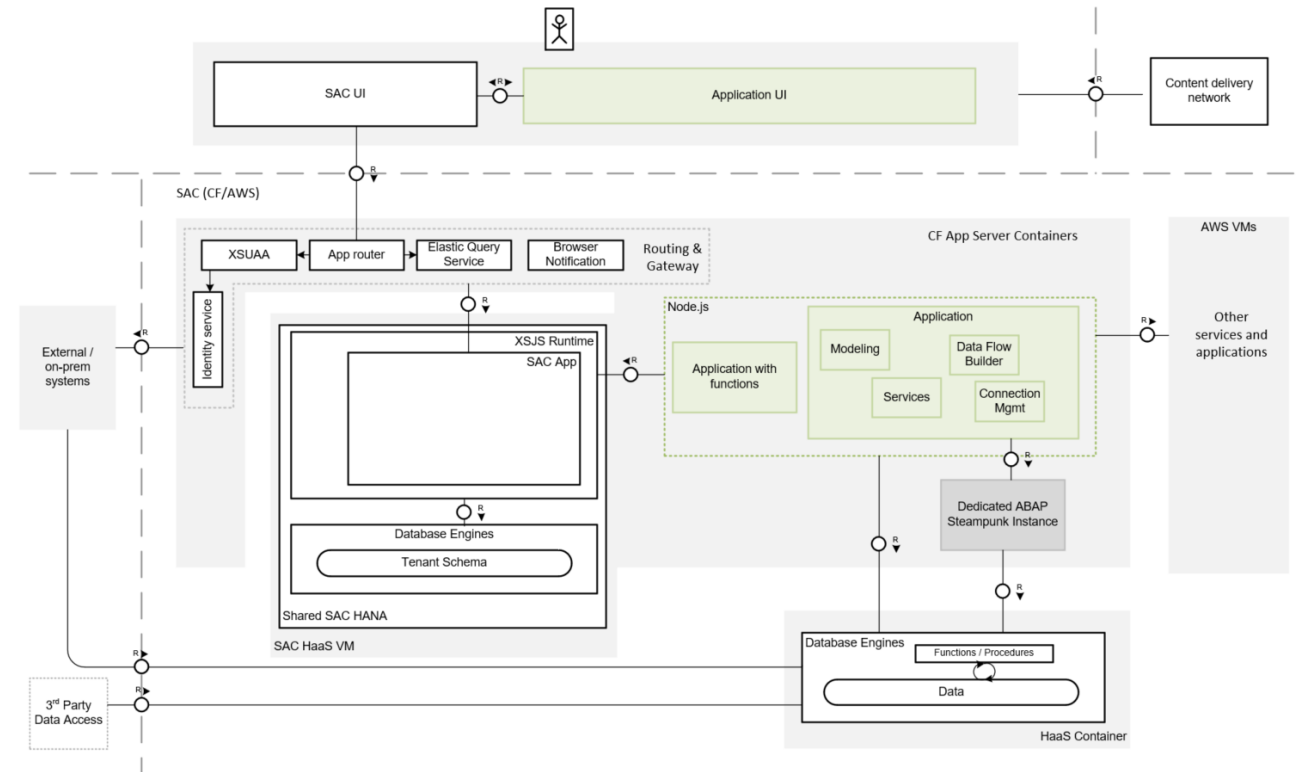

Use Case 1: Reference Architecture for Transformed Application

From ABAP on-prem to Node.js native cloud

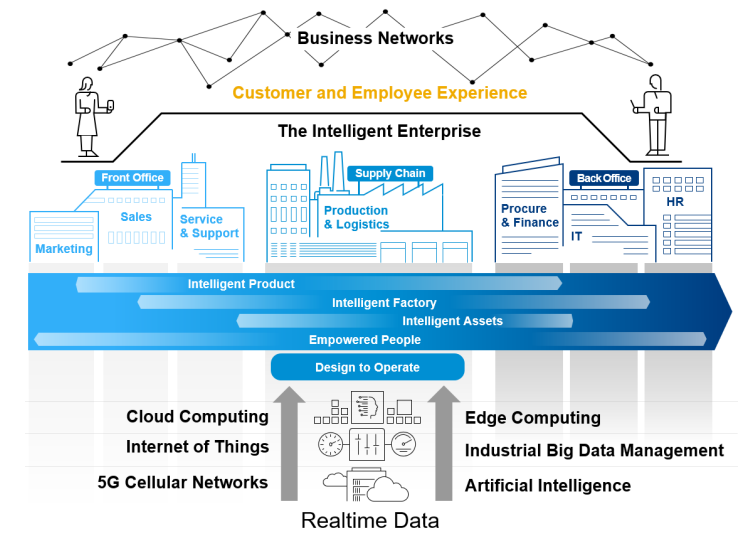

Before: on-prem

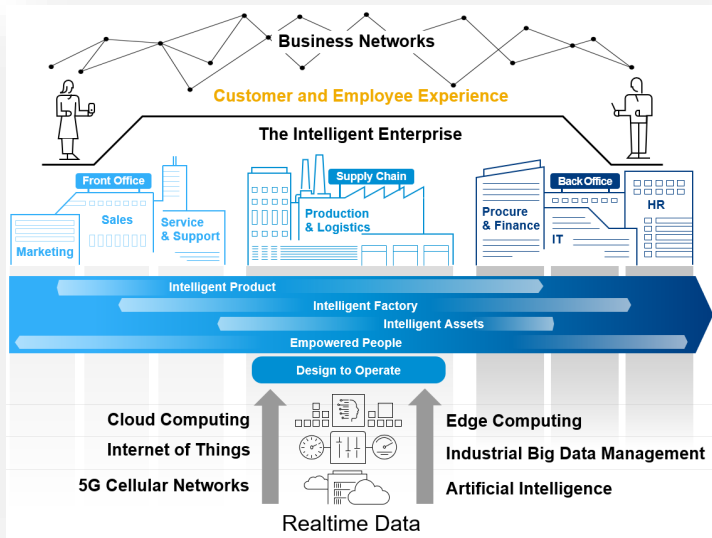

New: cloud

Use Case 2: Industry 4.0 Now

Use Case 2: Security Challenges for Industry 4.0 Now

Landscape
Complexity

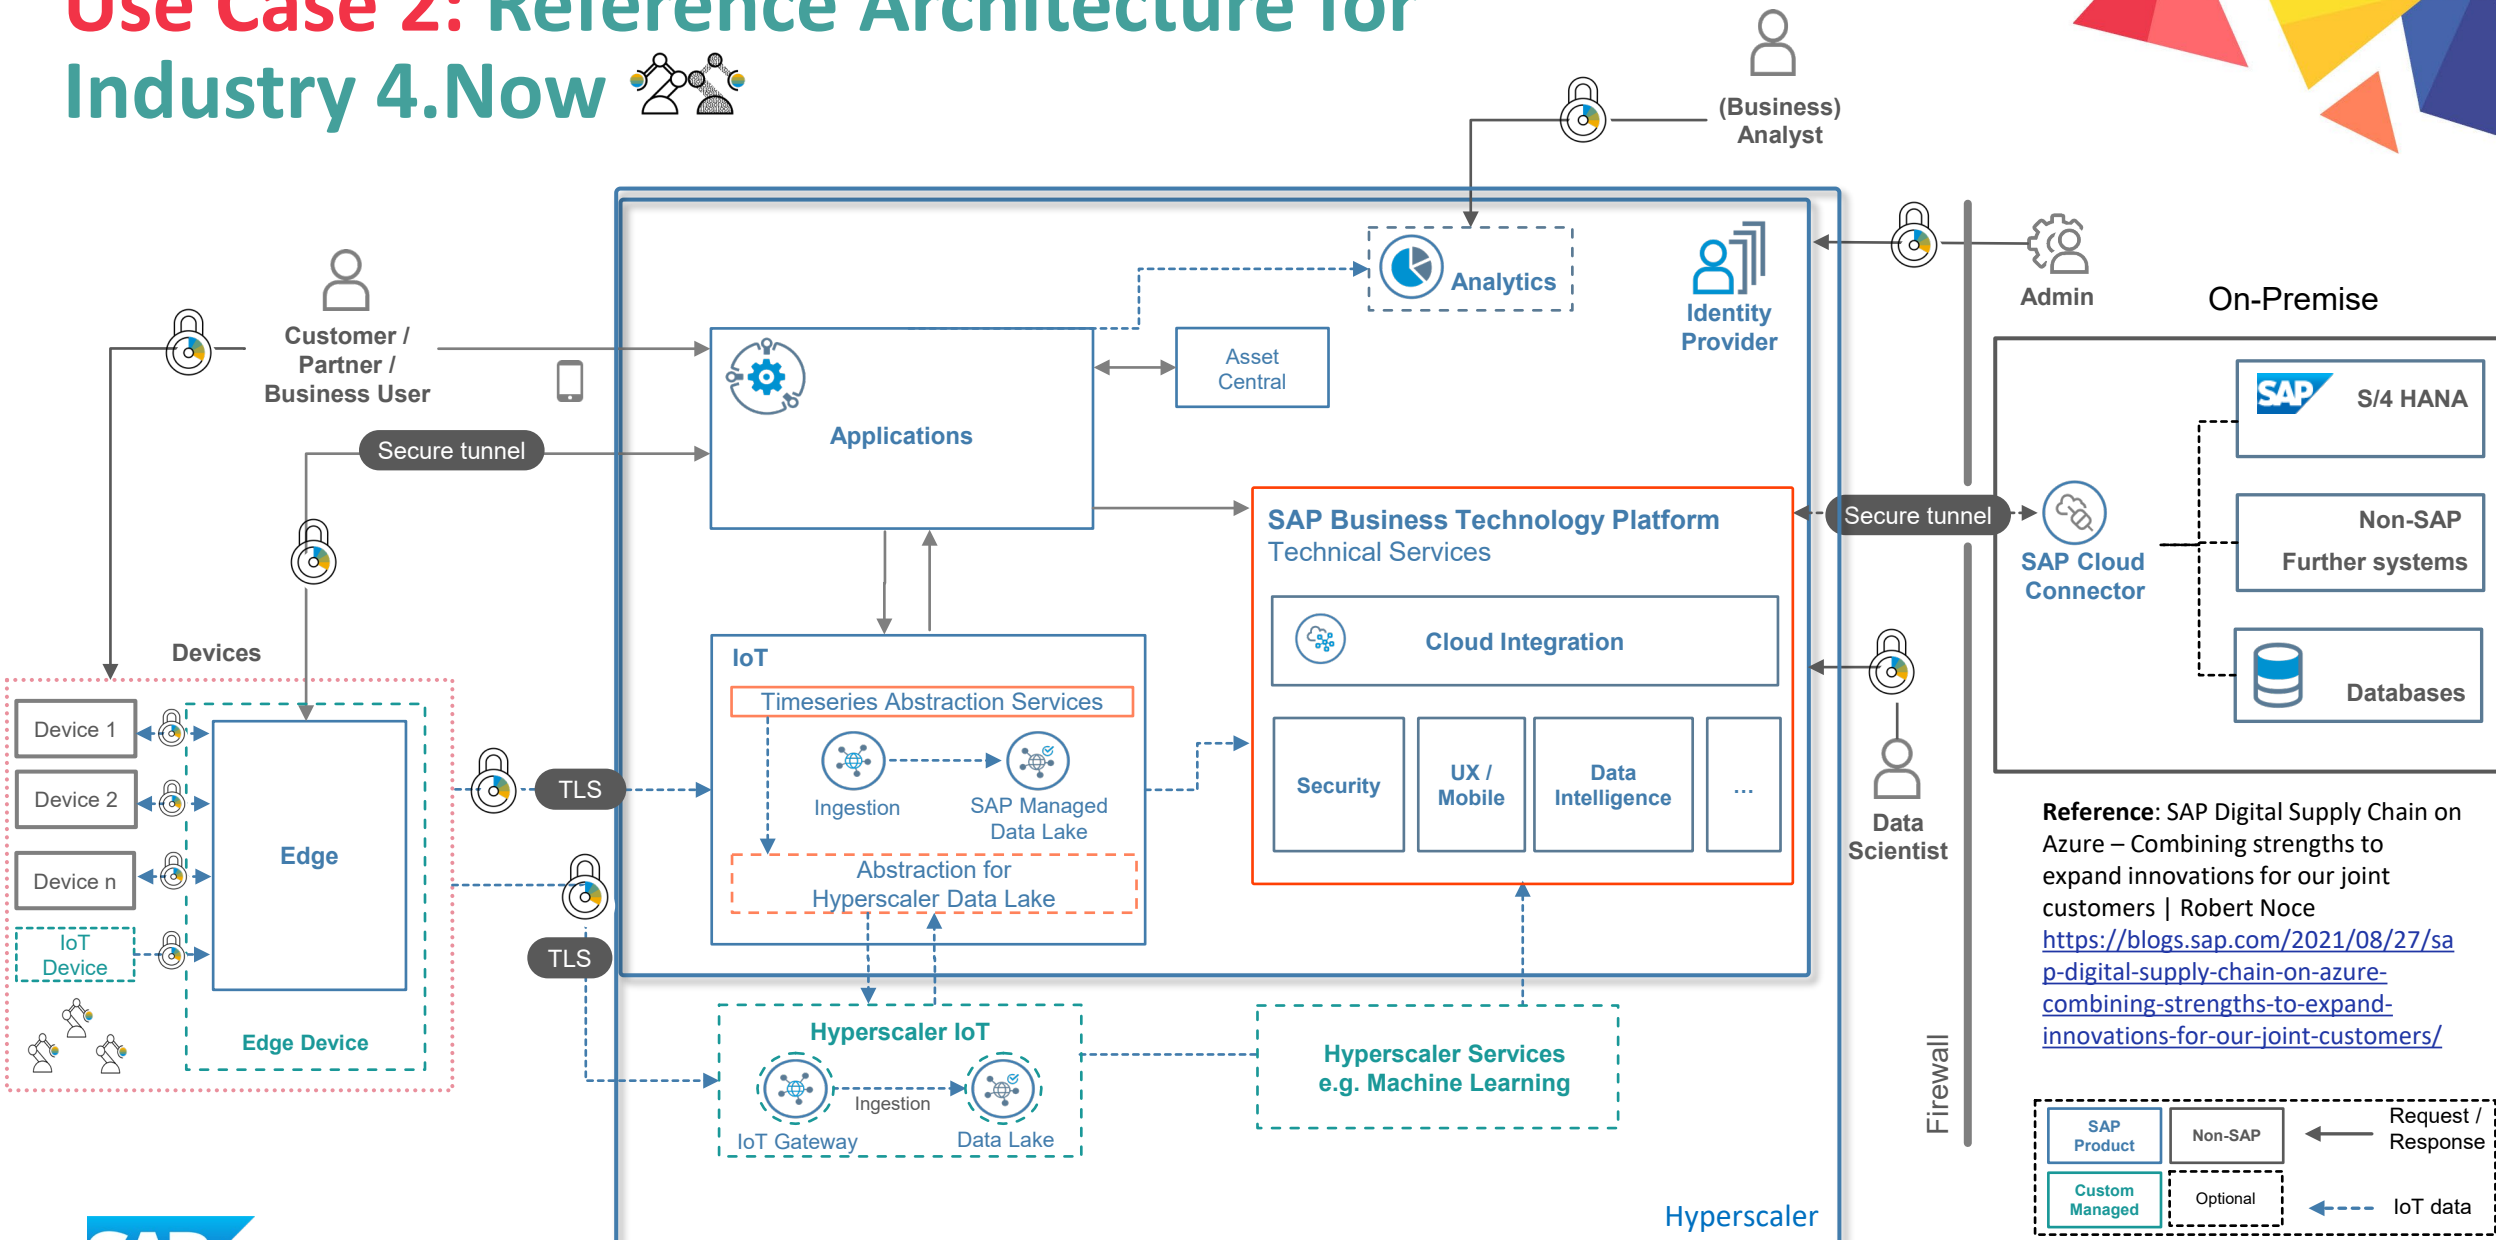

Digitization of
Industrial Technology

Intellectual Property
Concerns

Use Case 2: Reference Architecture for Industry 4.0 Now

#RSAC

Use Cases Summary: Security at SAP

Build-in security at every level of organization, connected security to business objectives

- Built-in security capabilities and processes
- Incorporated latest technical services (qualities) for integration or security capabilities
- Onboarding to operations and audit services

RSA[®]Conference2022

Takeaways

Apply what you've learned

Step forward to the higher level of security maturity at your organization.

1. Security Culture

- Connect security to business objectives
- Security Culture Toolkit: www.sap.com/about/trust-center/security.html?pdf-asset=c8573354-f87d-0010-bca6-c68f7e60039b
or use tinyURL: tinyurl.com/SecurityCultureToolkit

2. Process

- Integrate, automate, improve
- Threat model DevOps processes and tooling

3. Technology

- Perform risk assessment: application, infrastructure, 3rd party
- Build security into everything; defense in depth; foundation
- SAP's transformation: www.sap.com/documents/2020/02/520ea921-847d-0010-87a3-c30de2ffd8ff.html
