# Disclaimer

During the course of this presentation, we may make forward looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC. The forward-looking statements made in the this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward looking statements we may make.

In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not, be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

### SPLUNK CERTIFIED

**Content:** [App](#) | **Compatibility:** [6.2](#) | **Platform:** Platform Independent | **Categories:** [Security and Compliance](#) , [IT Operations Management](#) | **Author:** [Travis DePuy](#) | **Downloads:** 81 | **Released:** May 18, 2015 | **Updated:** Jun 15, 2015

# What Can You Certify ?

## Apps and Add-Ons

# What's An Add-On

- A single reusable component
- Not specific to any one specific use case
- Won't typically contain a navigable user interface
- Search command , Modular Input ,Data Model , REST Endpoint etc....

# What's An App

- Serves a particular use case, targets a specific type of user or a specific domain of operational visibility
- Will have a navigable user interface, setup screen
- Comprise many more knowledge objects than simple Add-Ons
- May be comprised of 1 or more reused Add-Ons
- A holistic experience for a particular data domain

# How To Get Your App Certified

## > Certification

Get your application certified to signal to users that your application conforms to Splunk's standards for high quality. When you submit your application to Splunk's App Certification Program, we use a specific set of criteria to evaluate the level of quality, usability and security your app offers to its users. These criteria encompass standards and best practices regarding the function, performance, and security aspects of your app. Additionally, we consider the documentation and support you offer to your app's users.

Before requesting certification, please make sure you are able to commit to the following documentation and support:

- A documentation URL

☐ Request Certification

# Certification Process

## Security Check

Currently done by contractor. Plan is to move in house

## Content Check

- Examples
- Hidden, empty local dir, etc?
- Well formed XML?
- Disk impacting settings (ie, index, tscollect, etc)
- Warn on deprecated features.
- More...

## Function Check

- Installs as documented?
- Eventgen?
- Verify CIM ( if applicable)
- Single server?
- Distributed?
- More...

## Performance Check

- Flash/non Flash
- Post processing for dashboards
- Examine searches
- More...

Lead Generation

More visible presence on Splunkbase

Grow your business !

# Lead Generation

The screenshot shows the Splunkbase website interface. At the top, there's a dark navigation bar with the Splunkbase logo, links for CATEGORIES, TECHNOLOGIES, and FOR DEVELOPERS, and a search bar. Below this is a blue bar with 'ADMINISTRATOR TOOLS' and links to Manage App, View App, and View Analytics. The main content area is divided into a left sidebar and a right main panel. The sidebar lists various app components like Hosting, Description, Screenshots, Documentation, Settings, Leads (highlighted), Editors, and Downloaders. The main panel is titled 'USER LEADS' and contains a section for downloading contact information. It offers three radio button options: 'Last 7 Days' (selected), 'Last 30 Days', and 'Custom Range'. Below these are two date input fields showing '07/05/2015' and '07/12/2015', separated by a 'to' label. A blue 'DOWNLOAD' button is positioned below the date fields. The footer includes a sitemap, contact, careers, privacy policy, terms of use, export controls, and a report a problem link, along with social media icons for Twitter, Facebook, LinkedIn, YouTube, and RSS.

Send users supplemental information about using your app  
Contact users about technical issues you have discovered in your app  
Contact users about upgrades that are available for your app  
Reach out for more business opportunity

# Reference Material

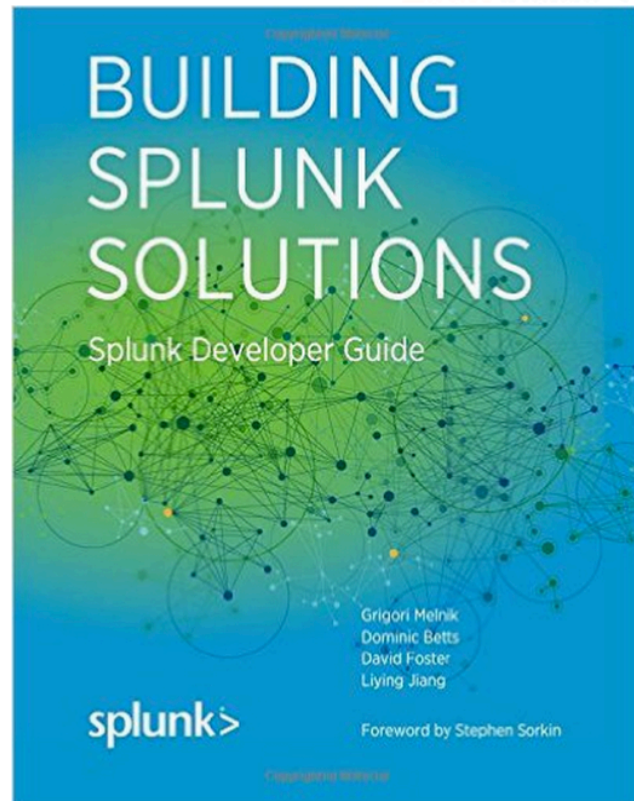

The best way to ensure your App will pass certification is to follow our own best practices.
