The Digital Risk Dilemma

How To Protect What You Don't Control

Nick Hayes

A Shift In Mindset

From Prevent... To Detect And Remediate

Minimize the impact

How quickly can you take action?

- Stolen intellectual property, exposed credentials
- Brand hijacking, ad scams, account takeovers
- Digital extortion, attack coordination
- Executive/VIP safety
- Third-party risks
- Phishing

**WHAT ARE
YOU
LOOKING AT?**

Tailor your threat intel
to *your business*.

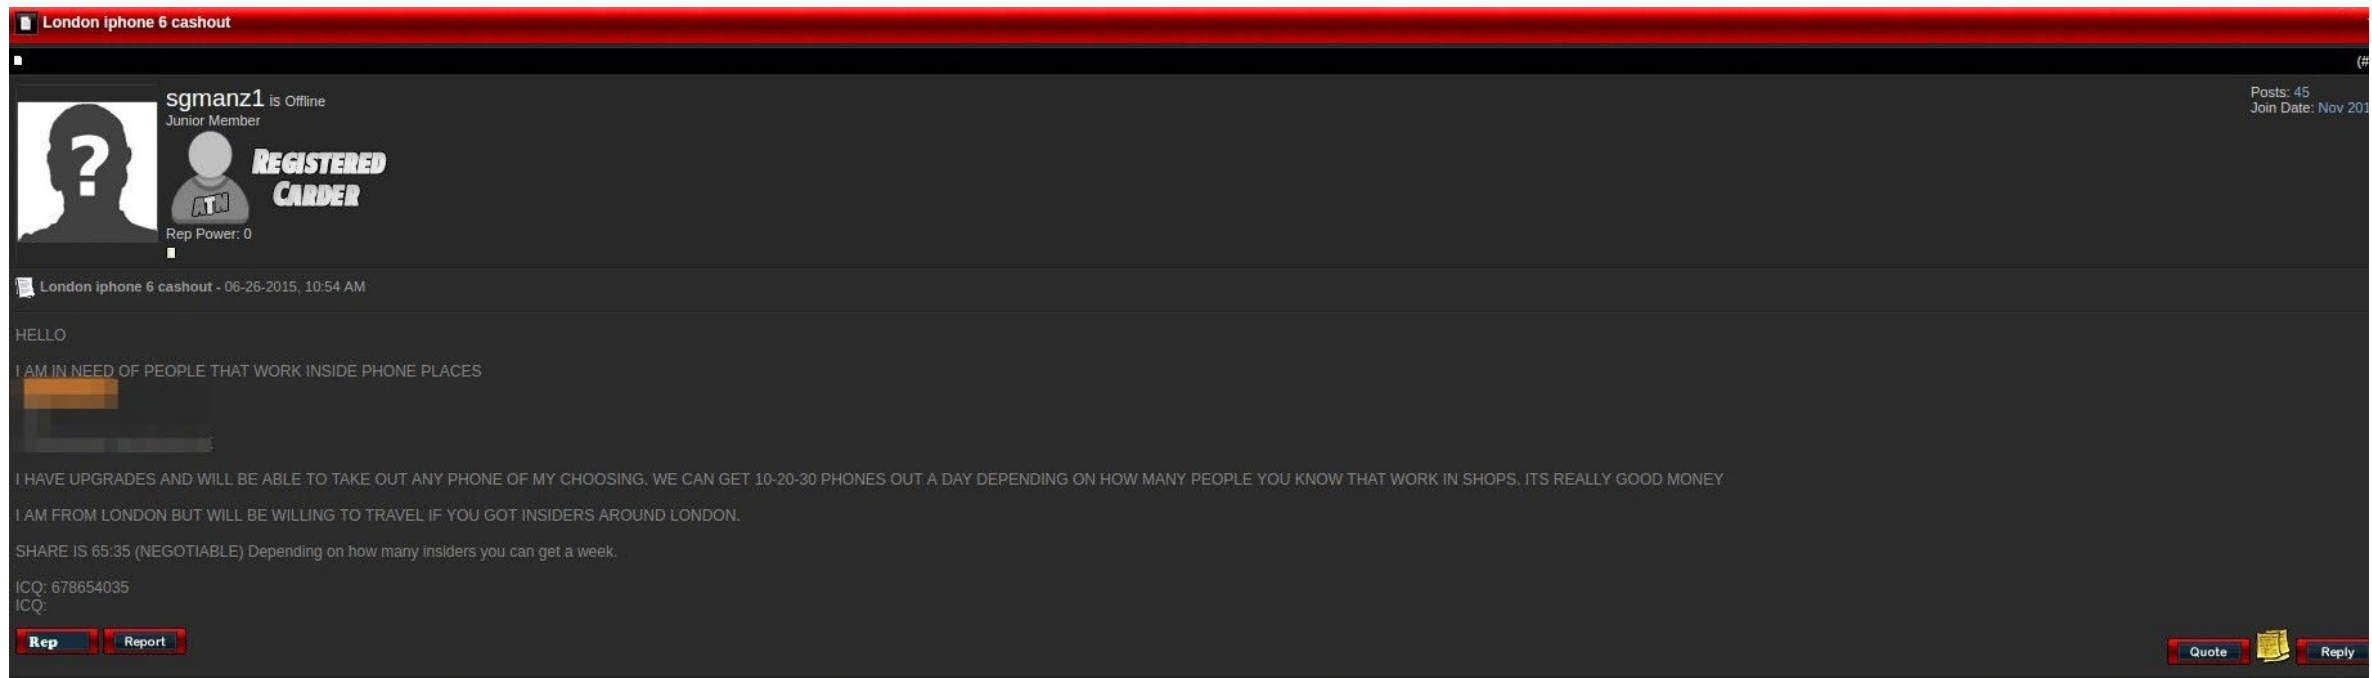

Limit your exposure, track your third-parties at scale

- Contracts, invoices
- NDAs
- Blueprints
- Factory schematics

Make sure your intellectual property *stays yours*

London iphone 6 cashout - 06-26-2015, 10:54 AM

HELLO

I AM IN NEED OF PEOPLE THAT WORK INSIDE PHONE PLACES

I HAVE UPGRADES AND WILL BE ABLE TO TAKE OUT ANY PHONE OF MY CHOOSING. WE CAN GET 10-20-30 PHONES OUT A DAY DEPENDING ON HOW MANY PEOPLE YOU KNOW THAT WORK IN SHOPS. ITS REALLY GOOD MONEY

I AM FROM LONDON BUT WILL BE WILLING TO TRAVEL IF YOU GOT INSIDERS AROUND LONDON.

SHARE IS 65:35 (NEGOTIABLE) Depending on how many insiders you can get a week.

Digital Risk Protection (DRP) In Three Steps

Three-step process for continuous digital risk protection

Map

Catalog your entire digital footprint.

Monitor

Actively scan for new instances or modifications of your digital assets.

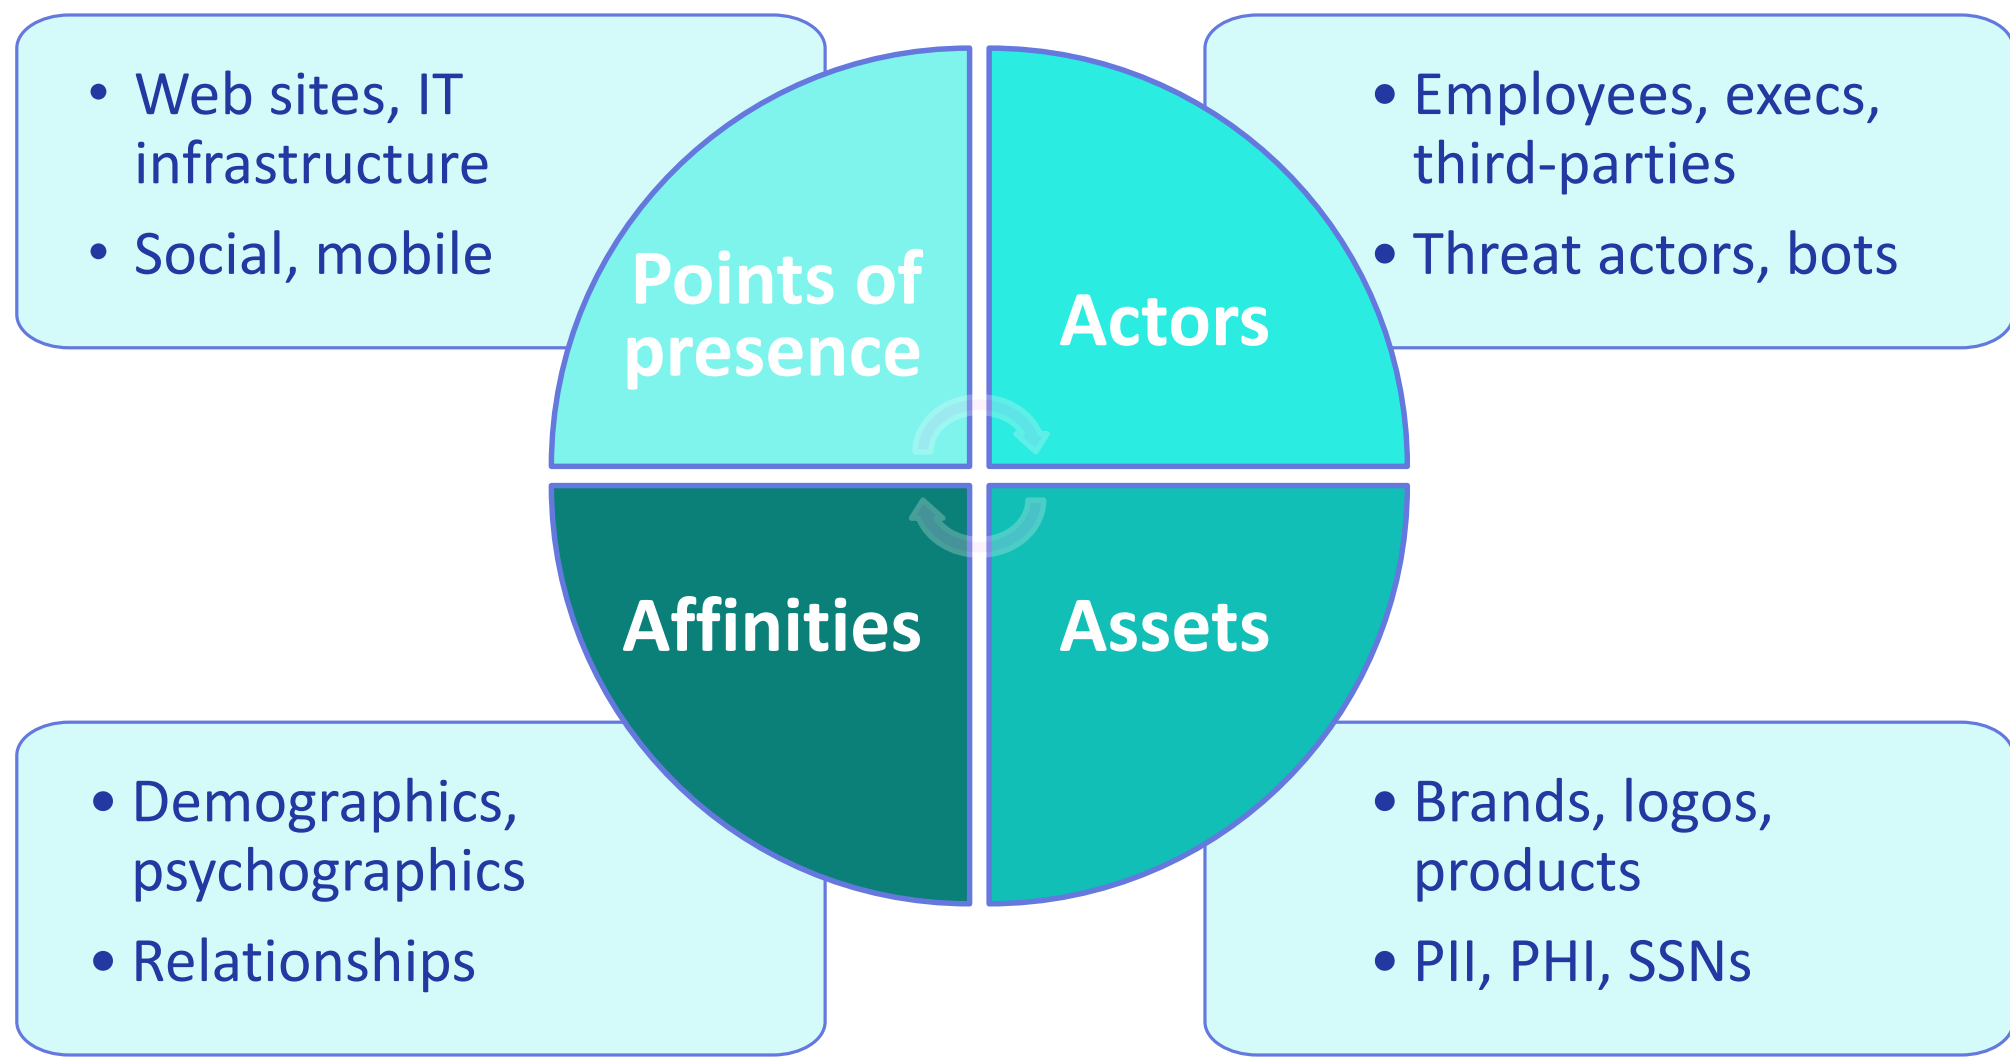

Mitigate

Streamline controls and remediation plans to curb risk impact.

Map your footprint

Map your footprint, in context

Establish consistent visibility

- Data collection techniques
 - Access: APIs, pay-for-access data, other security intel feeds
 - Harvesting: Data crawlers, bots, sensors, etc.
 - HUMINT: analyst-curated, in-depth investigations
- Breadth and depth of risk analytics
 - Scope: number of assets, entities, regions, data types
 - Frequency: rate of scans – weekly, daily, real-time
 - Sophistication: risk scoring, alert options, data visualization

Prepare your response

- Digital risk scenario analysis
- Technical controls and contingencies
 - External: Takedowns and event remediation
 - Internal: Integration w/ security tools: firewalls, ESGs, etc.
- Response teams and plans
 - Decision trees, crisis communications
 - Key external stakeholders, regional support

RSA®Conference2019

What next?

Threat alerts are only
useful in context.

Preparing your approach

- What immediate challenges do we want to solve?
- Where are our assets and exposures? What do attackers see?
- What can we integrate or automate to improve our remediation? Internally and externally?
- How can we leverage threat intelligence in the long-term?
- What are our expected outcomes in 6 months, 1 year, 3 years?

Key takeaways

1. Assume you lost -- detect and remediate supersede prevent.
2. Threat intel improves your SecOps – when it's *contextualized* and *actionable*.
3. Define your use-cases; start with one or two.
4. Get comfortable with grey; strive for risk-based decisions.
