

## Integrating an Environmental, Social & Governance (ESG) Strategy into Your GRC Programs

### A Healthcare & Human Services Case Study

#### OVERVIEW

With new market demand for an effective and long-term strategy to improve ESG initiatives, Sevita identified Onspring as a simple tool to execute their plans and manage year-over-year performance tracking. Annual self-assessments evaluated the organization's performance across seven focal areas, and automated notifications to assign owners with resolution tasks for underperforming scores.

*"Onspring is fantastic.  
We can easily track ESG  
assessments & tasks while viewing  
our ESG score year-over-year."*

*Jennifer Neville,  
Associate General Counsel*
