

2018 State of DevOps

An expert panel

Hal Rottenberg
Staff Sales Engineer / DevOps Practitioner / Developer
Evangelist / Solution Architect

October 2018

Forward-Looking Statements

During the course of this presentation, we may make forward-looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC.

The forward-looking statements made in this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward-looking statements we may make. In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

Meet the Panel!

The State of DevOps Report

puppet.com/devops-report

- ▶ Yearly survey
- ▶ Now in 7th year
- ▶ 30,000 respondents

2018 State of DevOps Report

puppet.com/devops-report

Key Findings - 2017

- ▶ High-performing teams continue to achieve both faster throughput and better stability
- ▶ Automation is a huge boon
- ▶ DevOps applies to all organizations
- ▶ Loosely coupled architectures and teams are the strongest predictor of continuous delivery

Key Findings - 2018

- ▶ DevOps evolution is nonlinear.
- ▶ Culture, automation, measurement and sharing practices expand as organizations evolve
- ▶ Executives have a rosier view of DevOps progress than the teams below them
- ▶ Automating security policy configurations is a critical practice to get to the highest levels of DevOps evolution
