

BANK-IN-A-BOX

Rearchitect your
bank's cloud journey
to meet the most
demanding needs
of the banking industry.

By 2020 there will be 20 times more useable data than today, 81% of bank CEOs are concerned about the speed of technological change, more than any other industry.

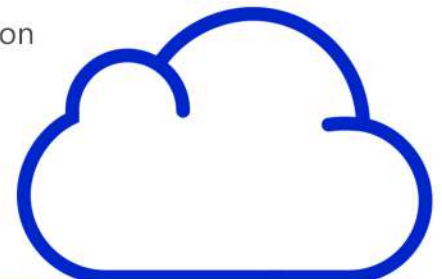

46% of consumers today prefer using digital channels for their banking.

In response, many banks and financial institutions are turning to the cloud, employing it as a business asset to transform the company and reshape their operating models, their products and services and customer experience. Cloud is the foundational element for this digital change.

Cloud4C has created Bank-in a-box in partnership with leading core banking and digital banking application providers to give you a single point of accountability with SLA at application login.

The cloud framework is built to align with the demanding needs of security, compliance, availability and flexibility to enable banks to launch their products to the market faster, besides accelerating their digital transformation journey. Whether it is hosting a greenfield or a brownfield core banking, LMS, Treasury setup or deploying new digital banking or channels **Cloud4C's Bank-in-a-Box** makes your journey to the cloud seamless.

As the banking industry fast progresses towards digital transformation and adoption of new technologies such as Artificial Intelligence & IoT, Blockchain, etc., Bank-in-a-box offers a single solution for all your IT needs.
