

Gain a 360° View of Cyber Risk with Ratings & Atlas

SecurityScorecard is the industry's only completely integrated security ratings and vendor assessment solution, cutting the **questionnaire cycle in half**.

Security ratings provide an outside-in view of risk that validates vendor-provided data in Atlas, giving you a truly objective 360° view of risk with SecurityScorecard Ratings **automapped to individual questions**.

For example, if there's a patching cadence question in an assessment, SecurityScorecard data about that organization's assets and the rate at which it applies patches will instantly appear side by side.

With over **12 million companies** continuously monitored, SecurityScorecard provides an unparalleled scale of cyber risk analytics alongside questionnaire responses.
