Facilitate “Well Postured” Directors

#RSAC

- Convince your C-Staff (CEO, CFO, CIO, COO, CRO) to enhance Board of Directors’ cyber security awareness and identify a board champion
- Recommend Boards gain indispensable insight on cyber security and breach impact in a controlled *strategic* “war game” environment
- Champion the concept that knowledgeable Director involvement of cyber security can minimize corporate impact of a cyber breach
- Remind Boards that prudent oversight can reduce potential Director, Officer & Company liability to regulators and shareholders

“By failing to prepare you are preparing to fail.” – Benjamin Franklin
