

# GoSecure YOUR TRUSTED ADVISOR

GoSecure is a recognized cybersecurity leader and innovator, pioneering the integration of endpoint, network and email threat detection into a single Managed Detection and Response service. For over 10 years, GoSecure has been helping customers better understand their security gaps and improve their organizational risk and security maturity through MDR and Advisory Services solutions delivered by one of the most trusted, skilled and experienced teams in the industry.

# **ADVISORY SERVICES**

### **Optimize Cybersecurity Programs**

The threat landscape changes every day. Attacks, such as ransomware, are on the rise. Preparation is the key to protecting the people, technology and data of an organization. So, how can organizations know if they are PREPARED to protect against a breach or respond to an attack if needed?

GoSecure offers a comprehensive set of end-to-end solutions to help organizations evaluate cybersecurity maturity, risks and gaps. The experts at GoSecure can assess existing technologies and collaborate with in-house resources to ensure that insights are actionable and practical - while delivering real-world solutions that enhance security posture.

### GoSecure Analytics and Al Services | Human-Centered, Data-Enabled Solutions

**GoSecure Analytics and Al Services** transform business operations using artificial intelligence (Al), analytics and machine learning (ML) to solve real-world problems.

- Our experts focus on enabling better decision-making and achieving your organization's objectives through the use of data.
- GoSecure Analytics and AI engagements are flexible, offering options that range from dashboards and data readiness evaluations to proofs of concept and fully developed solutions.

### GoSecure Breach Readiness Services | Prepare for Cyberattacks

**GoSecure Breach Readiness Services** test and sharpen incident response capabilities and prepare organizations to respond when a breach happens.

- The GoSecure Breach Readiness Assessment (BRA) offers a comprehensive evaluation of incident preparedness from business continuity to incident response and through disaster recovery, ensuring that the people, processes, tools and policies are ready when a breach happens.
- GoSecure Tabletop Exercises are custom-designed, real-world exercises that test
  tools, processes, polices and people with emphasis on group problem-solving under
  pressure. Communications, documentation and cross-functional engagement are also
  evaluated throughout the exercises.

### GoSecure Custom Cybersecurity Consulting Services | Put Our Experts to Work for You

Our team spans security disciplines to deliver proactive advice and recommendations to improve security posture tailored to your organization's needs.

- GoSecure Custom Cybersecurity Consulting engagements are designed to
  meet the specific needs of your organization and optimize your cybersecurity programs. We
  assist organizations who want to focus on building proactive solutions to some of the biggest
  challenges in cybersecurity today from how to defend against breaches to plans for
  recovery after an attack.
- Our engagements can include, but are not limited to, customized tabletop
  exercises, immersive offensive exercises and custom testing, threat simulation and threat
  emulation, threat intelligence workshops and briefings, technology and architecture strategy
  reviews, compliance and third-party risk policy / program reviews.
- Don't see what you are looking for? Contact us to learn about our full range of expertise.

"It (the Cybersecurity Assessment ) was incredibly useful, done in a sympathetic way. Of course, it generated two years of work, but it got us to where we are—decent firewall, decent switches, decent integrations with endpoints—all those pieces. If we had not done that security assessment, I don't think we would have gotten to where we need to be."

- Alan Tottman Director of Information Management and Technology Nova Scotia Pension Services Corporation

### GoSecure Cybersecurity Assessment | Understand and Improve Security Posture

Gain a comprehensive understanding of your security posture, risks and gaps with a **GoSecure Cybersecurity Assessment (CSA)**. This service provides actionable insights into your cybersecurity maturity and delivers practical recommendations based on your type of organization (size, industry, etc.).

- The CSA Enterprise includes several phases that assess the critical aspects of your technology, environments, policies and procedures, targeted to deliver overall security improvements.
- The CSA Essentials package is streamlined and highly focused, designed to provide
  the most important insights that can drive security roadmaps and improvements that
  address the biggest risks and issues based on the industry associated with an organization.

### GoSecure Incident Response Services | Respond and Recover Faster

A cyberattack can happen to an organization at any time. GoSecure Incident Response programs prepare organizations to contain, resolve and recover from breaches faster, minimizing operational, financial and reputational impact. GoSecure offers both retainer programs and emergency incident response services based on NIST SP 800-61r2 and SANS best practices.

- GoSecure Incident Response Retainer (IRR) When a breach happens, organizations with a
  GoSecure Incident Response Retainer in place have priority access to experienced professionals
  to help quickly contain and address the issue. IRR clients benefit from a team who already
  knows the systems, processes and people at your organization thanks to the Response
  Roadmap developed during the onboarding process.
- Emergency Incident Response (IR) Services The Incident Response team can provide emergency services with a short-term engagement. We offer access to security professionals who can help navigate through emergent incidents on a case-by-case basis.

"A Purple Team engagement allows an organization to pinpoint strengths and weaknesses in people, processes and technology in a safe environment-before the threats become a reality."

- Maxime Nadeau, GoSecure Ethical Hacker

## GoSecure Red & Purple Team Services | Improve Your Defenses

Red Team and Purple Team services can help you improve your security posture, deliver enhanced cybersecurity defenses and help better prepare your team to respond to real-world attacks. All engagements are custom-designed to the specific needs of your organization.

- GoSecure Red Team strategic engagements combine multiple available attack techniques with experienced security professionals to the test the in-house reaction and detection capabilities at an organization.
- **GoSecure Purple Team** strategic engagements take a 'test, fix, test again, repeat' approach to rapidly improve security posture for organizations through a long-term, collaborative engagement with in-house teams.
- Collaborative Threat Hunting engagements can be offered after a Red or Purple Team service or as a stand-alone. These custom-designed services will help enhance threat hunting skills for the in-house team by working with GoSecure experts on a real-world threat hunt scenario.

### GoSecure Privacy & Compliance Services | Improve Data Protection

**GoSecure Privacy & Compliance Services** evaluate and improve data protection and privacy practices to help achieve compliance goals.

- A comprehensive Privacy Practices Review and Privacy Practices Assessment delivered by the trusted privacy and security experts at GoSecure will evaluate the current privacy programs in place, assess the regulatory landscape that applies to an organization and help improve compliance with regional, national and international data protection standards.
- GoSecure offers Payment Card Industry Data Security Standard (PCI DSS) services.
   GoSecure is a Qualified Security Assessor in Canada and can conduct a full assessment resulting in a Report on Compliance (ROC), as well as assist organizations who need help with the Self-Assessment Questionnaire (SAQ).

### GoSecure Penetration Testing Services | Test Your Defenses

Rely on Penetration Testing from GoSecure to help identify the impact attackers can have on an organization. The Offensive Security Certified Professional (OSCP) team at GoSecure can offer engagements based on your threat model, including industry and technology stack.

- Our team delivers engagements that will identify where and how adversaries can target
  your organization, including internal and external networks, web applications, mobile apps,
  wireless networks, endpoints and mobile devices, physical security and social engineering/
  phishing attacks.
- GoSecure also has the specialized skills to assist with code review, SAP testing, cloud testing and embedded device/IOT/SCADA/industrial device testing, and other custom engagements.

### GoSecure Security Compromise Assessment | Find the Threats

A **GoSecure Security Compromise Assessment (SCA)** can help find the hidden threats that automation alone may not detect.

- The SCA combines 60 days of GoSecure Titan® Managed Detection and Response (MDR)
  with skilled, experienced human threat hunting, which delivers an edge over pure
  automation that can find threats that could potentially compromise current or future
  operations.
- The SCA can identify potential risks to your networks, endpoints and more. Your organization will receive a comprehensive report that explains our findings in detail.
