#### Disclaimer

During the course of this presentation, we may make forward looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC. The forward-looking statements made in the this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward looking statements we may make.

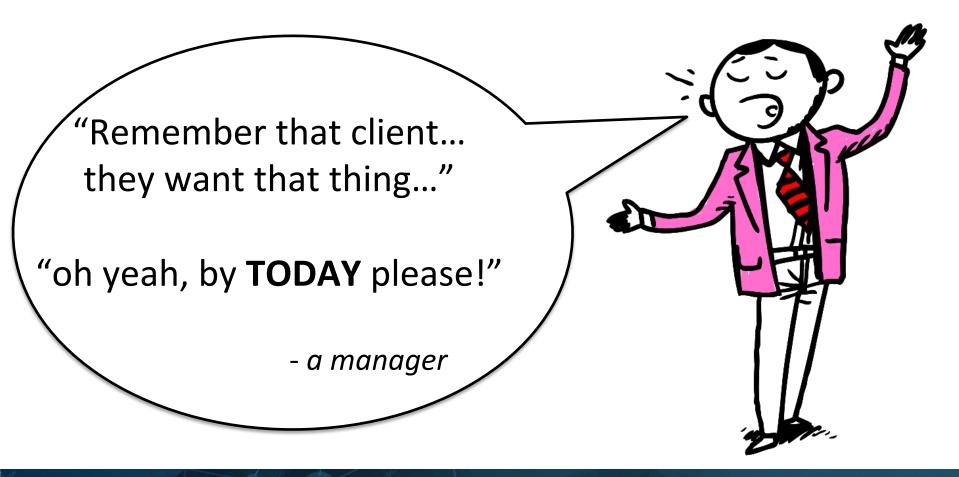

In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not, be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

#### Who Am I?

# Brisbane, Australia... 5pm...

a normal Friday

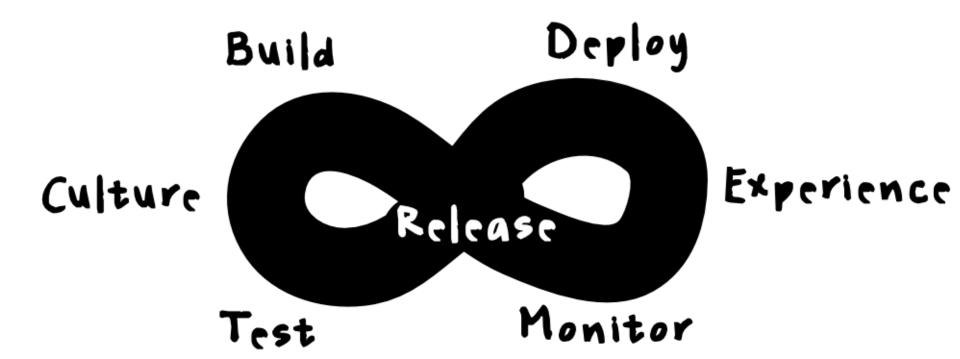

#### Would You Release??

# Devops

#### DevOps Tool Chains

ŸJIRA

## How Can Splunk Help?

talking by Designify.me from the Noun Project Eye by Atacan Gucluol from the Noun Project Businessman by Viktor Fedyuk from the Noun Project

#### **Answer Important Questions!**

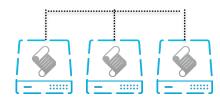

Who authorised a Cloud Formation release that impacted a firewall white list?

When was the last successful build for our flagship app?

Which cookbook applied a certificate change to the Load Balancer?

Which version of the software is running across our web farm?

#### What Is Out There?

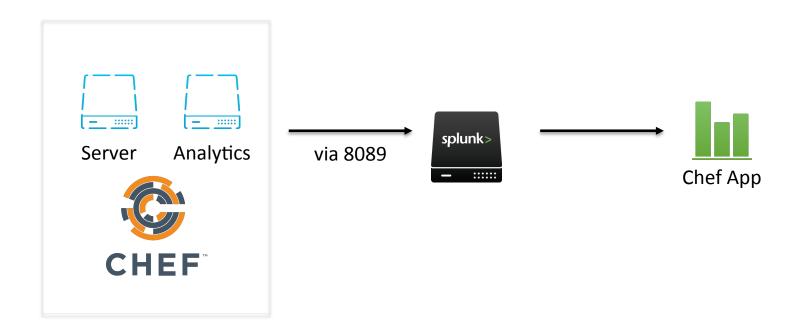

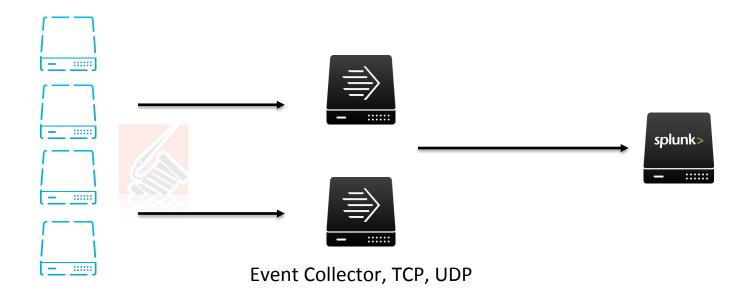

#### Push - Chef

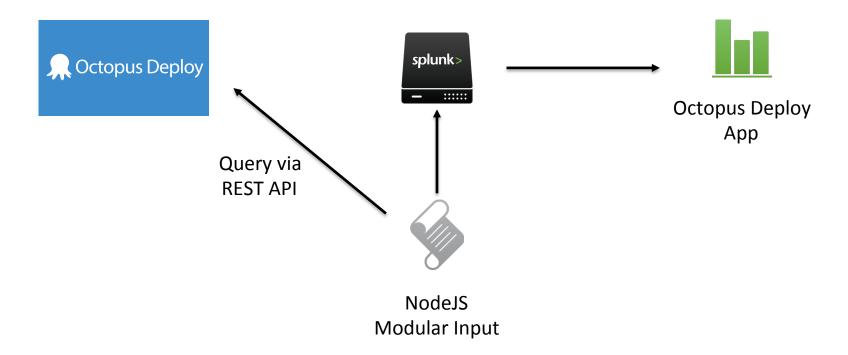

#### **Push - Your Applications**

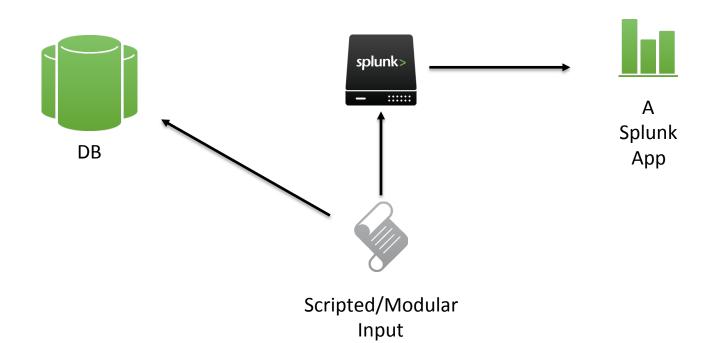

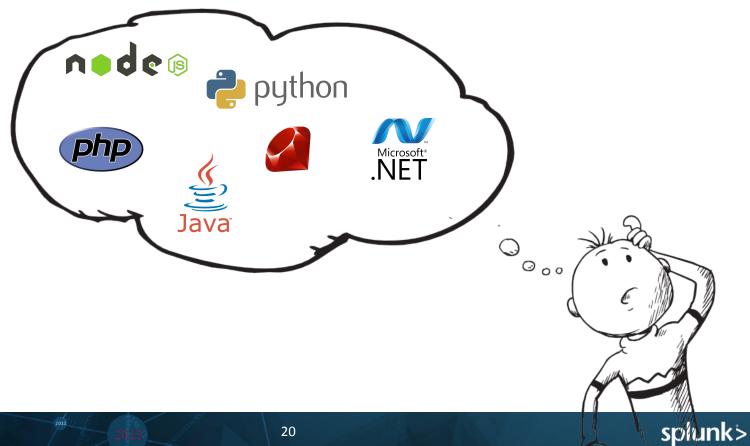

#### Pull - Octopus Deploy

#### Pull - Database

### What about my apps?

### Bring it together!

Build reporting across DevOps tooling silos

Talk to other teams and examine your tooling

Notifications of significant pipeline events

Are you ready for DevOps?
