::::Probely

Probely Enterprise is a top-tier cloudbased DAST Scanner designed for enterprise companies that manage many web applications and APIs, internal or exposed on the Internet.

Probely empowers Security and DevOps or Development teams to work together to secure their web applications and APIs.

With Probely, you can automate security testing in the most efficient way. You can narrow the gap between development, security, and operations teams by integrating security testing into your development processes, from your CI/CD tool to your issue tracker.

Probely reports vulnerabilities that matter, false-positive free, and includes detailed instructions on how to fix them.

Web Application and API Security Scanner

BENEFITS

- Identify, manage and fix vulnerabilities in your web applications and APIs with a simple and intuitive user interface.
- Evidence-based scanning eliminates false positives so that you can focus on remediation.
- Easily integrate into your SDLC process to streamline and secure your web applications and APIs from the development phase.

- Generate vulnerability reports, including OWASP Top 10 and PCI compliance.
- Following an API-first development approach means that you can access all features and data of the application through our robust, well-documented API.
- Detailed "How to Fix" information to use along with valuable scan feedback for faster remediation.
- Narrow the gap between development, security, and operations by making security an intrinsic part of your development life cycle.

Development and security teams can be aligned regarding cybersecurity!

We built our own tool to orchestrate security tools, evaluate risks, escalate priorities and manage our CI/CD pipeline. Probely was the missing piece, enabling us to seamlessly integrate with their service through their full-featured API. We also ended up doing less analysis work since Probely only reports real vulnerabilities.

And thanks for the amazing customer support. Good job guys!

Luís Gomes

Security Manager Europe OLX Group

66 Cyber attacks are becoming more and more frequent and complex, which is why cybersecurity has been a growing business concern.

Probely helps us secure our web applications without compromising our project deadlines. We are able to start testing security in early stages of development, avoiding problems later, when the cost to fix is higher.

Our developers love Probely because of the easy instructions on how to fix the vulnerabilities and because it only reports what matters, false-positive free.

IT Deputy Director Pestana Hotel Group

KEY FEATURES

EVIDENCE BASED SCANNING

Get exceptional accuracy and thorough coverage without false positives (0.07% of all findings in 2021) with our evidence-based scanning

RELEVANT FINDINGS

Your engineers' time is valuable. Probely automatically adjusts the severity risk of the vulnerability based on its context and provides evidence to prove legitimacy.

CI/CD INTEGRATION

Fully automate your web application and API security testing by integrating Probely into your CI/CD pipelines and enjoy two-way sync with your preferred issue tracking platform.

COMPLIANCE

Demonstrate your compliance with PCI-DSS, OWASP TOP 10, ISO27001, HIPAA, and GDPR standards using a series of detailed management reports with requirements checklists and summaries.

DEVOPS-CENTRIC

Probely enables DevOps and Developers to become more independent to test the security of their applications.

API VULNERABILITY SCANNING

Scan both your rich web applications and APIs, including any micro-services and standalone APIs based on an OpenAPI (Swagger) Specification or Postman Collection.

NEXT GENERATION CRAWLER

Probely's revolutionary crawler, based on Headless-Chrome, crawls and indexes your rich, interactive JavaScript apps and sophisticated Single-Page Applications efficiently.

BUILT FOR ENTERPRISE

Probely Enterprise allows you to get everyone involved, scale up processes, automate tasks, and manage all vulnerabilities in one easy-to-use solution.

SEAMLESS DEVSECOPS PROCESS

Integrate Probely with your development processes to provide a seamless experience to your dev teams.
