现有各类竞赛 成效:

赛事丰富

关注度高 参与度强

提升学生 兴趣和实 践能力 培养出了 一批优秀 人才

不足:

质量参差不齐

内容同质化严 重

与工业界实际 需求存在差距

时效性落后

缺乏技术的分 享和交流

选手易遇到瓶 颈

WCTF大师赛: 定向邀请十支国际一流战队

出题环节:

每队设计两道题、主办方帮忙部署 题目要求: 创新性、合理性、稳定性、现实意义

解题环节:

战队可解其他战队出的题 32小时、场上每队5人、不限制场外辅助人数

分享环节:

出题者分享出题思路

裁判、选手匿名投票评分

标准:创新性、合理性、稳定性、现实意义

精彩赛题回顾: Gyotaku The Flag (TokyoWesterns)

Welcome to Gyotaku service!

鱼拓服务: 存储用户提交的数据 没有漏洞,如何窃取数据?

精彩赛题回顾: Gyotaku The Flag (TokyoWesterns)

2019 Pwnies Award 提名:

AV + Javascript engine + EICAR

Credit: @icchy

"No implementation, no bugs?" PROVEN FALSE.

At a Chinese CTF, Japanese hacker @icchy briefly presented a cool technique for using Windows Defender (or any other AV) as an oracle, based on Microsoft's (hilarious) inclusion of a working Javascript engine and using the EICAR string as a trigger. He literally owned a CTF flag that had no implementation.

精彩赛题回顾: TPM2137 (Dragon Sector)

RadomSemi[™]

Engineering Your Budget

TPM2137

Secure Passkey Verification

OVERVIEW

Offering the best balance of cyber and price, the TPM2137 offers a simple yet secure solution for password and secret checking in your application.

RadomSemi™ offers full customizability on the password that the device verifies, as long as the password is exactly 8 characters.

FEATURES

- Industry standard UART idle-high receive-only interface at 115200 baud.
- Single 12MHz clock source.
- Simple 'ok'/'wrong' LED output pins, active low.
- Based on Truly Unhackable™ FPGA Technology.

Refer to the TPM2137 Secure Passkey

FPGA bitstream

可信赖平台模块(TPM) 不可破解?

FPGA真的安全吗?

精彩赛题回顾: Browser Training (ESPR)

```
arr = [1.1, 1.2, 1.3]; arr.x = 2;
function foo(idx) {
'arr[idx] = 8.691694759794e-311;
}
foo(0);
*OptimizeFunctionOnNextCall(foo);
arr[0x100000] = 1.23; // 改变元素类型
foo(0x0000000); //越界写
```

编译依赖移除、多样化漏洞利用技术
