

# Dejia Wang

Founder, Chairman and CEO, PAYEGIS

Dejia Wang is the founder of PAYEGIS and has been the Chairman and CEO since 2011. Dejia founded PAYEGIS with the singular vision of empowering consumers and consumer-facing businesses to win the war on mobile, account and transaction fraud. Mr. Wang gained more than a decade of experience working with consumer and transaction data and generating business insights out of big data. From 2001 until 2006, Mr. Wang worked at the leading CRM company Siebel Systems (acquired by Oracle), where he served in various engineering and management positions in US. From 2006 until 2011, Mr. Wang held senior architect and director level positions at Supply Chain Planning, Monetization-As-a -Service and Predictive Marketing Analytics startups: TrueDemand (acquired by Acosta), PlaySpan (acquired by VISA) and M-Factor (acquired by DemandTec, then by IBM).Mr. Wang is also a founding member of Lyris next-generation multi-channel Marketing Optimization Platform. Mr. Wang received PhD in Mathematics from University of Wisconsin-Madison, MS in Computability Theory from Institute of Software, Chinese Academy of Sciences, and BSs in Probability and Statistics, Economical Management from University of Science and Technology of China. Dr. Wang has dozens of patents pertaining to data insightand fraud detection technologies.

# 伪造地理位置

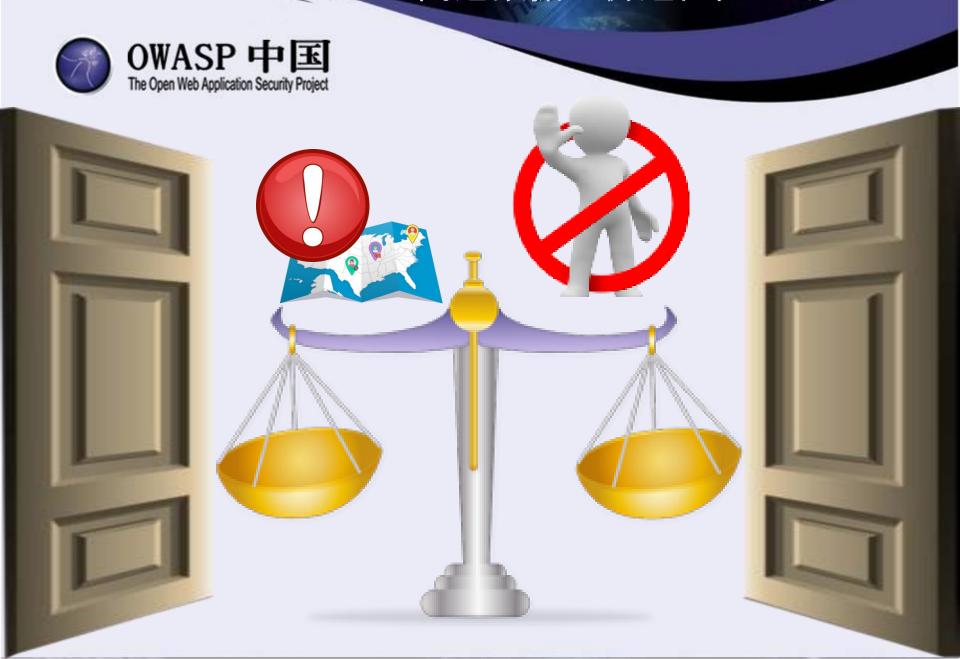

例二: 高危数据+伪造位置 == 禁止?

# 丰富多彩的设备种类

# 伪造设备

例三:高危数据+伪造位置+伪 造设备==禁止?

### 身份认证场景小结

• 大数据反欺诈技术

- 高危数据情报

- GeoIP(代理检测、VPN识别)

- 设备指纹(机器人识别)

• 认证真实用户

#### 自适应验证

2014年以来,国际安全厂商提出自适应验证(Adaptive Authentication)做新型的身份认证,应用于反钓鱼、反撞库、无密码登录等多种场景

**BUILDING TRUST ON THE INTERNET** 

SECUREAUTH

# 密码泄漏

# 账号盗用

传统方案缓解账号泄漏产生的影响,新技术控制隐私数据泄漏带来的风险

# 基于风险的身份认证

### 基于风险的身份认证(续)

#### Scenario 1

Legitimate employee attempts to log in to access corporate data from office in Southern California using work desktop at 9:00 a.m. PST

#### Risk-based authentication analyzes:

User ID Password Device Fingerprint Location

Traditional Pattern

issued

computer,

normally

utilized by

user

from where

user nornally

works

Geo-velocity

IP Address

Login History

During normal working hours

#### Scenario 2

Legitimate employee attempts to log into corporate email in San Francisco on smartphone at 8:30 p.m. PST

#### Risk-based authentication analyzes:

User ID Password Device Fingerprint Location Geo-velocity

Traditional Pattern

Valid

device

associated

with user

near enough

geographically

location

Valid

Login History

During abnormal working hours

#### Scenario 3

Attacker attempts to log in to access corporate data from the UK using a personal computer at 2:30 a.m. PST

#### Risk-based authentication analyzes:

User ID Password Device Fingerprint Location Geo-velocity

Traditional Pattern

Unknown Abnormal device, no Location and association not near to to user standard

Distance travel inappropriate for user's last login time

IP Address

During very abnormal working hours

Login History

# 支付场景

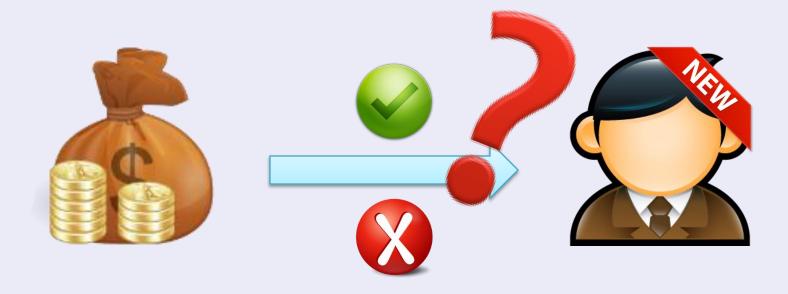

# 大度空间理论

# 例四:新关系 == 拒绝?

# 行为习惯

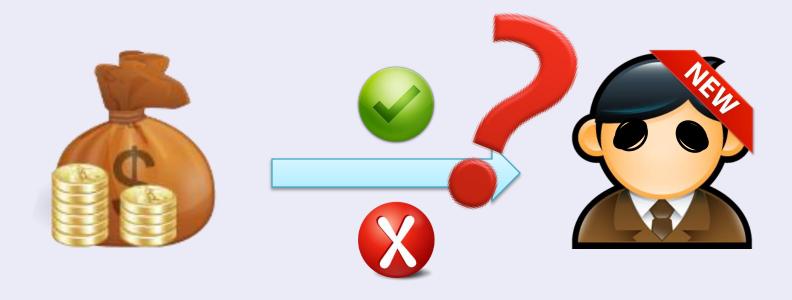

# 例五:新关系+新行为 == 拒绝?

# 偏爱喜好

8:00 起床

9:00 上班

9:30 开会

10:00 编码

11:40 午饭

12:00 午休

13:00 工作

18:00 下班

18:30 加班

22:00 下班

23:00 睡觉

例六: 新关系 + 新行为 +新喜 好== 拒绝?

### 授权场景小结

• 大数据反欺诈挖掘

- 挖掘关系

- 挖掘行为

- 挖掘偏好

• 授权真实意图

### 七度空间里的决策大脑

情报

情报收集、交换、大数据挖掘,构建威胁前摄型安全防御体系

• 场景一: 登录(认证问题)

• 场景二:支付(授权问题)

场景三:贷款(审核问题)

总结

# 我要贷款!

真有说的那么 好?还是慎重 点好, 元芳你 怎么看?

我需要贷款, 我现在的项目非 常好,只要贷款成功,肯定可 以获取很多回报,到时候连本 带利都还你!

我是业务员,我已经实地考察 过了,并访问了周边的商户, 调研了他们产品的市场,未来 潜力非常大,赶快审核通过吧。

你们的产品什么时候量产啊? 亲戚朋友试用后都说好,我七 大姑八大姨还都等着用呢, 赶 快啊~

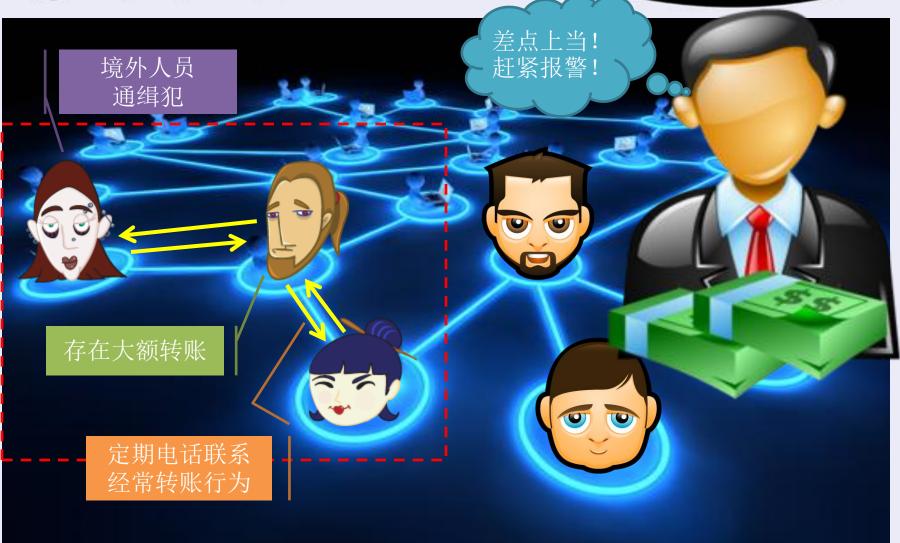

# 例七: 侦查隐藏关系

# 例八:侦测欺诈环

例九:捕捉异常事件

# 例十:用户信誉

姓名:XXXXX

性别:男

不良记录:

拖欠信用卡 有逃票行为 盗窃过自行车 打架斗殴 关在看守所X个月

### 审核场景小结

- 大数据反欺诈应用
  - 侦查隐藏关系
  - 识别关系图谱中的欺诈环

- 捕捉异常事件

- 刻画用户信誉

• 审核真实身份

• 场景一: 登录(认证问题)

• 场景二:支付(授权问题)

• 场景三:贷款(审核问题)

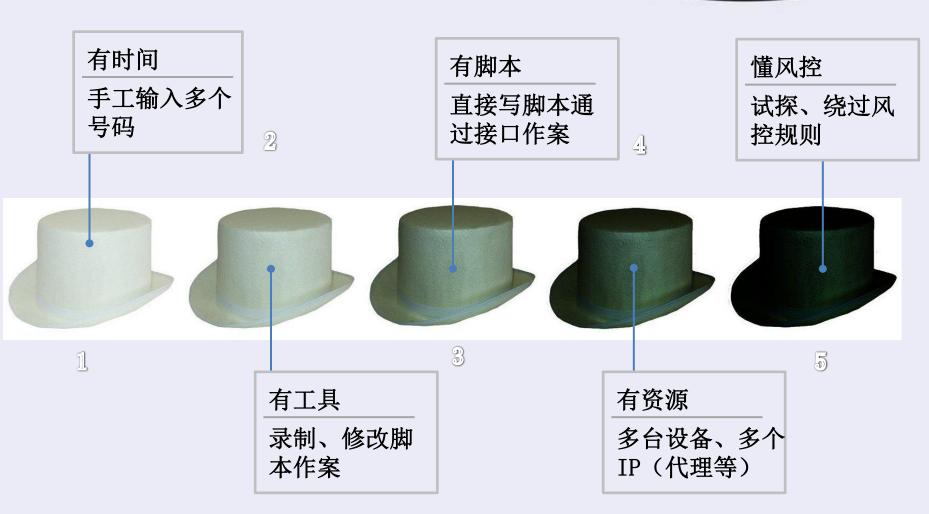

总结

- 一切的问题都是真实度的问题
  - 真实的人
  - 真实的设备
  - 真实的位置
  - 真实的行为
  - 真实的偏好
  - 真实的关系
  - 真实的信誉
