ANVILOGIC

BETTER DETECT, HUNT & TRIAGE

The Anvilogic Detection Automation Platform

Because nobody likes being treated like a robot.

Why try to be a human correlation engine and keep spinning in SOC chaos?

"This is the MOST actionable cyber-security product I have ever seen in a SOC"

- SOC Manager, Fortune 500 Online Payment Platform

Leverage the platform to reduce time, complexity and expertise needed to build detections and strengthen your overall SOC team and operations.

1 **REDUCE ENDLESS BACKLOG & COMPLEXITIES**

More easily communicate across teams and data owners to identify new detection opportunities.

2 **GAIN FLEXIBILITY & FASTER TIME TO DETECT AND DEPLOY**

Reduce the time it takes to create custom code to increase the detection of malicious activity via alerts (rules), reports (dashboards), or automation (scripting).

3 **STOP THE CHURN OF TALENT, TUNING, AND FALSE POSITIVES**

Make threat intelligence consumable by integrating it with SIEMs and other tools part of the security arsenal (SOAR, EDR, etc.).
