Security	Built-on a zero-knowledge security model	Built-on a zero-knowledge security model

ADDITIONAL OFFERINGS:
Advanced Single Sign-On

|	TEAMS	BUSINESS
Overview	–	Add an unlimited number of single sign-on applications in the built-in portal with over 1,200 pre-integrated applications
Price	–	$2 user/month
Number of Applications	–	Secure an unlimited number of cloud applications
Reporting	–	Automated, detailed reporting including App reports, Notification reports, and SAML event reports
Web Portal	–	User-friendly way for employees to access all their applications within the LastPass vault

ADDITIONAL OFFERINGS:
Advanced Multi-Factor Authentication

	TEAMS	BUSINESS
Overview	–	Provide multi-factor authentication protection on single sign-on applications, VPNs, workstations, and identity providers. Additional Admin controls, such as geofencing and IP address policies
Price	–	$3 user/month
Policies	–	Enable granular geofencing, time, and IP address policies
Authentication Methods	–	Biometric (face and touch), pin code, time based 6-digit codes, one-tap push notifications, YubiKey
Contextual Intelligence	–	Intelligent authentication based on login context: location, device, and network
Endpointed Protected	–	Password vault, single sign-on/cloud apps, VPN, workstations (both desktops and servers accessed via remote desktop protocol), identity providers, LDAP/Radius on-prem apps
Adaptive Authentication	–	Combine biometric and contextual intelligence to build individual user profiles and adapt authentication to different scenarios
Passwordless	–	By using biometrics and adaptive authentication, LastPass MFA eliminates passwords on workstations, single sign-on, and VPNs

Add both offerings to LastPass Business to receive a bundled price of $9 user/month.
