One Identity Solutions

Secure what matters most with unified identity security

Quick facts

- 80 of the Fortune 100 as customers

- 5,000+ enterprise customers around the globe

- 250+ identities actively managed

- 1,300+ partners worldwide

- 50 enterprise- and consumer-grade products

- 20+ years serving some of the largest and most demanding organizations around the globe

- A Quest Software business

Vertical Expertise

- 10/10 in fiancial services

- 9/10 in healthcare

- 4/5 in telecom

- 8/10 in aerospace and defense

- 4/5 in energy

- 8/10 in technology

* Categories and rankings based on Fortune 2000

Our Perspective

With the proliferation of human and machine identities, the race to the cloud and the rise of remote working, protecting identity has never been more important. The key impediment to doing so is the fragmented way in which most organizations manage access rights.

One Identity brings together the four core elements of identity security – Identity Governance and Administration (IGA), Identity and Access Management (IAM), Privileged Access Management (PAM), and Active Directory Management and Security (ADMS) – to help customers holistically address this challenge. We call this unified identity security.

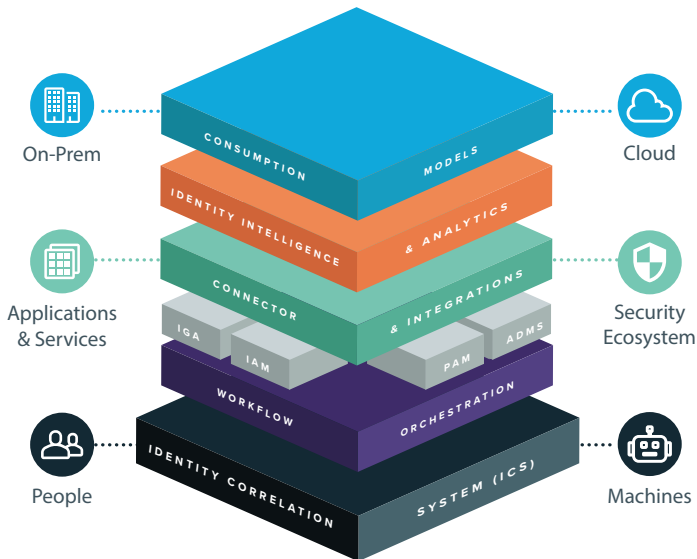

Moving from a fragmented state to a unified approach to identity security delivers numerous operational benefits, such as correlating all identities, removing friction between formerly distinct technologies, and facilitating automation and orchestration.

This model also provides a critical level of added protection. With 360-degree visibility, adaptive security controls, and the ability to apply analytics across all identities in the enterprise, organizations can verify everything before granting access to their most-critical assets. This level of response and control allows cybersecurity executives to shrink windows of exposure, move closer to achieving Zero Trust and improve their overall security posture.

Unified Identity Security Platform

One Identity's vision is not to simply help customers solve all their identity security problems with fragmented point solutions. We believe there is significant value in integrating these technologies into a single, cloud-first platform – what we call our Unified Identity Security Platform.

On-Prem

Cloud

Applications & Services

Security Ecosystem

People

Machines

The foundation of our platform is in an identity-correlation system that delivers a consistent view across users, machine identities and accounts to help organizations move from a fragmented to a unified state. Workflow orchestration eliminates manual and error-prone activities; connectors deliver flexibility by bringing disparate applications and security ecosystems under a single point of control. Powering all of this is identity intelligence and analytics to help cybersecurity professionals get a clear view of their risk profile and take corrective actions as needed.

Key Offerings

- **Identity Governance and Administration:** Complete, business-driven governance for identity, data and privileged permissions
- **Identity and Access Management:** Secure workforce, partners, and customers while increasing operational efficiency and accelerating digital transformation efforts
- **Privileged Access Management:** Protect privileged accounts and enable identity-centric Zero Trust for just-in-time access
- **Active Directory Management and Security:** Enhance management of Active Directory/Azure AD for efficiency, security and to achieve Zero Trust

Industry Recognition

- Leader in the 2021 Gartner® Magic Quadrant™ for Privileged Access Management
- Leader in the 2021 Gartner® Magic Quadrant™ for Access Management
- Leader in the 2019 Gartner® Magic Quadrant™ for Identity Governance & Administration
- 2021 Emerging Vendors in Security by CRN
- Leader in KuppingerCole 2021 Leadership Compass for Identity Governance & Administration
- Leader in KuppingerCole 2021 Leadership Compass for Identity as a Service (IDaaS)
- Leader in KuppingerCole 2021 Leadership Compass for Privileged Access Management
- 2021 winner of Cutting-Edge Identity & Access Management technology by Cyber Defense Magazine

About One Identity

One Identity delivers unified identity security solutions that help customers strengthen their overall cybersecurity posture and protect the people, applications and data essential to business. Our Unified Identity Security Platform brings together best-in-class Identity Governance and Administration (IGA), Identity and Access Management (IAM), Privileged Access Management (PAM) and Active Directory Management and Security (ADMS) capabilities to enable organizations to shift from a fragmented to a holistic approach to identity security. One Identity is trusted and proven on a global scale – managing more than 250 million identities for more than 5,000 organizations worldwide.
