Risk Cloud® Integrations

Risk Cloud adapts seamlessly to how your company already works.

Get Connected

Risk Cloud works with the tools and technology you use every day so you can hit the ground running. What does that look like for you? Avoid a learning curve, accelerate adoption, and get a truly holistic GRC experience. From plug-and-play to customized functionality, integrate your current tech stack into Risk Cloud.

Integration Types

1. Native Integrations

Integrate with the technology you already rely on for your most important governance, risk, and compliance tasks. Native integrations are available in Risk Cloud through an API token ready for you to use.

2. Risk Cloud Connectors

We wanted to make things easier, so we created a bunch of pre- and custom-built integrations to help you tackle common GRC use cases. Efficiency is waiting for you.

3. API Access

With LogicGate's Open REST API, you can connect to any desired integration.

Offering the most flexible and advanced level of integration, you can create exactly what you want.

Risk Cloud Integration Universe

Integrations can be added on at any time to allow you to integrate with the other platforms you use most frequently.

Native Integrations	API Access	Risk Cloud Connectors
Integrations native to Risk Cloud	Access to the RESTful API to connect to third party tools	Connectors for common GRC use cases as well as custom integrations, developed and managed by our Integration Services team
Jira, slack, Microsoft 365	DOMO, Power BI, — do it yourself —, RESTful API </>, zapier	asana, BLACK KITE, CUBE, DocuSign, Google Drive, Microsoft Teams, Qualys, salesforce, Security Scorecard, servicenow, tenable.io
Included in the Platform		

LOOKING TO BUILD YOUR OWN INTEGRATION?
Our Integrations Services team is a group of dedicated individuals here to help you evaluate and build your dream integrations. Need a custom integration build via Workato? Consider it done. Or maybe some guidance on our general API and integration design? They've got you covered there, too. Connect with us to learn more.
