# PRADEO SECURITY
MOBILE SECURITY SOLUTION SUITE

pradeo

End-to-end mobile security

Each service can be implemented independently, or combined with another.

Mobile Threat Defense
01
Protect collaborators' mobile devices

Secure Private Store
02
Facilitate and expand safe BYOD usages

05
Mobile Threat Intelligence
Collect, process and get value out of security data

In-App Protection
03
Protect an application running on unmanaged devices

App Security Testing
04
Assess applications' security level prior to their distribution

Pradeo Security is recognized as **leader** of the **mobile security market** by

FROST & SULLIVAN

Gartner

IDC

What makes Pradeo different

- Detection of all mobile threats / 0-days

- Application, endpoint and data protection

- Customizable security policy

- Enforces compliance with data privacy laws

- Comprehensive mobile threat intelligence

The Pradeo Security technology is composed of an **Artificial Intelligence**-based behavioral analysis engine that works together with a machine learning structure. This **unique mechanism** enables a quick and **accurate identification of all threats** operating on mobile devices as well as mobile applications behaviors and vulnerabilities, automatically and on a large scale.

01
Mobile Threat Defense

PROTECT COLLABORATORS' MOBILE DEVICES

What	Automatic protection of mobile devices from app, network and OS threats, across configurations (BYOD, COPE, COBO...)
How	Dynamic device compliance update in MDM (BlackBerry, FAMOC, IBM MaaS360, Microsoft Intune, MobileIron, SOTI, VMware Workspace ONE...)
	First level of deployment in one click (app protection), second and third level with an on-device agent (360° protection)
Key Benefits	Protection of corporate and personal data
	Easy integration with existing mobile ecosystem

02
Secure Private Store

FACILITATE AND EXPAND SAFE BYOD USAGES

What	Dedicated to unmanaged mobile devices (BYOD, partners...)
	Automatic security check of devices accessing corporate mobile data or services and conditional access according to device integrity
How	Install as a simple app
	Remotely administrated
Key Benefits	Respect of users' privacy with no impact on personal usages
	No management cost

03
In-App Protection

PROTECT AN APPLICATION RUNNING ON UNMANAGED DEVICES

What	Automatic security check of devices using the protected application
	Conditional access to services and data according to device integrity
How	Ready-to-use SDK embeddable in a couple of hours
	Remote administration with no update required
Key Benefits	Quick deployment
	Fraud and data leakage prevention

04
Mobile App Security Testing

ASSESS APPLICATIONS' SECURITY LEVEL PRIOR TO THEIR DISTRIBUTION

What	Security audit to identify applications' behaviors and vulnerabilities before their release to end-users or distribution to collaborators
	Recommendations and option to eliminate unwanted behaviors
How	Dedicated online platform or API for development cycles
	Also available in IBM MaaS360 App Approval Workflow
Key Benefits	Ready-to-use
	Clear conclusion on applications' nature

05
Mobile Threat Intelligence

COLLECT, PROCESS AND GET VALUE OUT OF SECURITY DATA

What	Functionalities to have visibility on the current mobile threat landscape, through a threat intelligence feed, customized mobile security analyses, a mobile security event collector, access to a global app database or SIEM connectors.
How	Stand-alone or compatible with IBM QRadar, Splunk, ArcSight LogRythm, SmartEvent, RSA, McAfee, Fortinet and AlienVault.
Key Benefits	Actionable intelligence
	Provides the keys to implement tailored security measures
