Security Dome

## Holistic supply chain security

The Challenge

Sharing information is critical for every organization's activities but is also a source of concern. Receiving files from software providers, customers, suppliers and partners can introduce risks since file-based attacks including Zero Days, Exploits, and other weaponized content can evade detection-based technologies. Today there are multiple content collaboration platforms , and while they protect data "in-flight", they require integrating advanced threat prevention technologies to ensure that the files saved in them are safe.. These integrations require ongoing management, so organizations still find themselves having to balance security and usability leaving themselves vulnerable to attacks.

The Solution

In order to meet this challenge, GateScanner Security Dome protects multiple content delivery routes in one solution, by integrating the award winning GateScanner® Content Disarm and Reconstruction (CDR) technology to ensure that every file delivered is safe. GateScanner CDR combines highly optimized Multi-AV and NextGen Detection technologies to block known threats and prevents undetectable attacks using proprietary file disarm, transforming every file into a neutralized (harmless) trustworthy copy, protecting against weaponized content that has never been seen before.

GateScanner® Security Dome Use Cases:

✓ Secure File Sharing and Uploads
✓ Browser download security
✓ Secure Email / Messaging
✓ Browser Based Portable (USB) Media security
✓ Automation of B2B and multi-route file transfers
✓ Cloud Storage Synchronization

GateScanner® Security Dome

File sharing & Internet Download — HTTPS (Upload & Download) / Secure Reply

Vault

Domain User — HTTPS (Upload & Download) / Secure Reply

Cloud Storage (OneDrive, Private Cloud) — Cloud Sync (Automation)

GS CDR 1 — GS CDR n — GateScanner engine(s)

Corporate Data Center — FTP\FTPS\UNC\SMB (Automation)

Proven Technology

Founded in 2013, Sasa Software successfully protects governmental agencies, defense contractors, financial institutions, public utilities and healthcare enterprises.

Independent tests demonstrate GateScanner® prevents up to 99.9% of undetectable threats*

GATE SCANNER *Security Dome*

GateScanner® Security Dome Highlights:

✓ Fully SaaS and Multi-Tenant Capable

✓ All-in-one Browser-based platform for Secure File sharing, Secure Email, Automated File Transfers Between Networks, and Cloud Storage Synchronization with full GateScanner CDR integration

✓ Chromium Plugin for browser download security including webpage URL categorization – supports Google Chrome and Microsoft Edge

✓ All files are stored in a highly secure and encrypted vault, offering an alternative to MFTs , and the CyberArk file vault / DCA client

✓ Supported file sources/destinations: Email, Vaults, OneDrive, FTP, FTPS, SFTP, UNC, and shared/local folders

✓ Includes a "secure reply" mechanism to enable external users to safely return filesScans password protected files with a secure mechanism allowing users to supply the file passkey preventing threat evasions by using

✓ Customized policies for multiple domains, user groups and individual addresses interfacing with Active Directory.

✓ Includes a rich reporting dashboard detailing scanning activities and results.
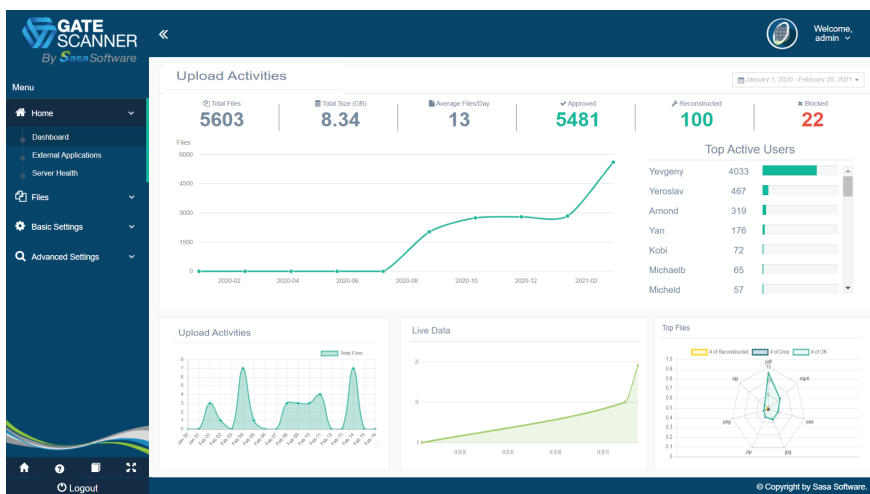

Secure Email File Transfer

Robust Dashboard
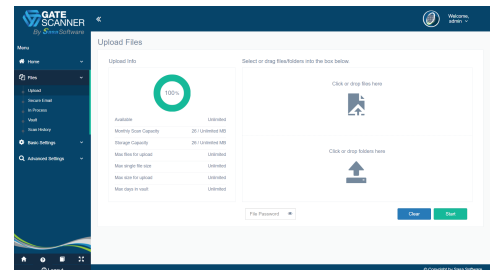

Secure File Vault Upload

GateScanner® Security Dome Specifications

✓ **Delivery Options:** As a Service, Private Cloud, On-Prem

✓ **GateScanner® Security Dome Front-End:**
Installed on Windows Server (2012 R2 onwards)
Minimum Requirements: 4 vCores, 8GB RAM, 250GB HD (SSD Recommended)

✓ **GateScanner Engine(s):** Supplied as a pre-configured secured virtual/physical based on Windows 10 IoT
Requirements per engine: 4 vCores, 8GB RAM, 60 GB SSD

✓ **Supported File Types:** Supports full CDR for hundreds of file type combinations, including the entire suite of MS Office, PDF, media files
(images, audio, video), Archives, PST, .EML, installation files, XML, HTML, other text files, medical imagine files (DICOM) and customized files.

Chromium Browser Plugin
